Compulsory Education Textbook

Mathematics

SHUXUE

Grade 2 Volume 1

北京师范大学出版社

Beijing Normal University Press
BEIJING NORMAL UNIVERSITY PRESS

Dear children,

You are now in Grade 2. Let's step into an even more wonderful world of mathematics together.

Wise Old Man

To know how much change you should get for a bottle of mineral water, you need to know about money; to know how long a pencil is, you need to learn to measure.

Taoqi

We will learn multiplication and division, and also fun multiplication facts.

Xiaoxiao

Woof woof! This book also has fun games and interesting maths activities!

Clever Dog

Children, mathematics is everywhere in life. As long as you are willing to use your head and are good at finding maths problems in daily life, you will become smarter and smarter and love mathematics more and more.

Your friends, the editors

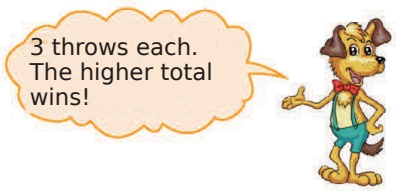
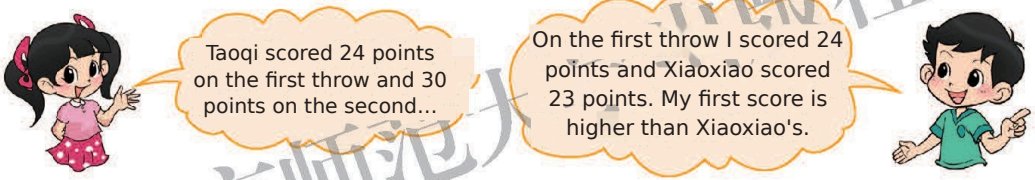
Unit 1 Addition and Subtraction

Who Scores Higher?

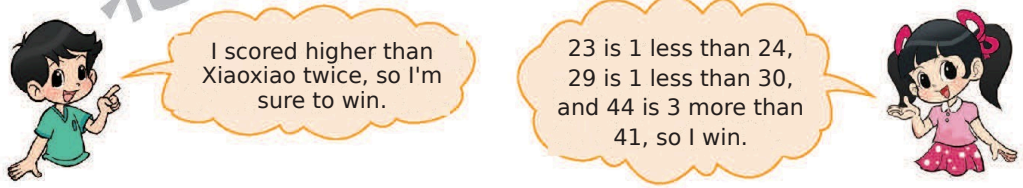
	Throw 1	Throw 2	Throw 3
Taoqi	24	30	41
Xiaoxiao	23	44	29



Talk about it: what maths information can you find in the table?



Who is right?



Calculate: how many points did each of them get? Who wins in the end?

$24+30+41=\square$ ( )

$\square\bigcirc\square\bigcirc\square=\square$ ( )

$20+30+40=90$
$4+1=5$
$90+5=95$

$24+30=54$
$54+41=95$

$24+30+41=95$

Answer: Taoqi got ___ points in total, Xiaoxiao got ___ points in total, ___ wins.

Practice

1. Dart-throwing contest.

	Round 1	Round 2	Round 3
Qisi	35	23	30
Miaoxiang	40	26	20

3 throws each. A miss scores 0. The higher total wins!

(1) Talk about it: what maths information can you find in the table?

(2) Can you tell who wins, Qisi or Miaoxiang? Discuss with your partner.

(3) How many points did Qisi get in total? What about Miaoxiang?

2. How many people are in the three groups altogether?

3.

$24+16+27$ $\qquad$ $49+17+32$

$15+26+44$ $\qquad$ $33+29+25$

4. The table shows the medals Chinese athletes won at recent Olympic Games.

	Gold	Silver	Bronze
2000	28	16	15
2004	32	17	14
2008	51	21	28
2012	38	27	23

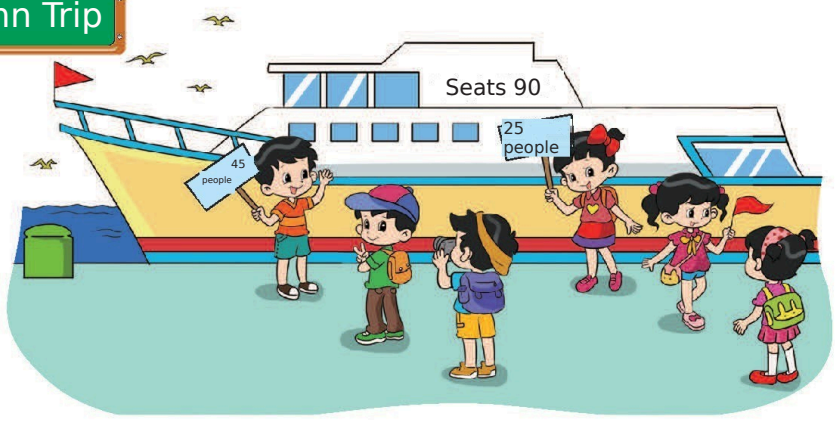
(1) How many medals altogether in 2000?

(2) How many medals altogether in 2008?

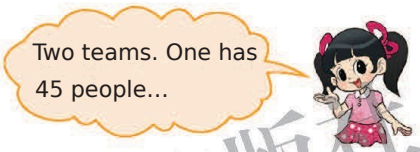
(3) Ask another maths question and try to answer it.

北京师范大学出版社

Autumn Trip



Talk about it: what maths information can you find in the picture?



After both teams get on the boat, how many empty seats are left?

First take away one team, then...

$90-45-25=\square$ ( )

$$\begin{array}{r} 90 \\ -\ 45 \\ \hline 45 \end{array} \qquad \begin{array}{r} 45 \\ -\ 25 \\ \hline 20 \end{array}$$

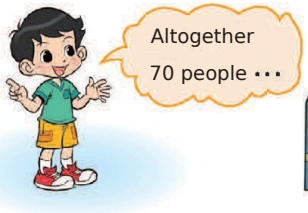
First find how many people in all, then...

$45+25=\square$ ( )

$90-\square=\square$ ( )

Answer: After both teams get on the boat, there are ___ empty seats left.

Going back to school by bus: how many people are not on the bus yet?



北京师范大学出版社

Practice

1.

(1) Talk about it: what maths information can you find in the picture?

(2) How much does Aunt Zhang have left?

Receipt

Story Books ¥18

Craft Books ¥32

(1) What maths information can you find on the shopping receipt?

(2) How much change should Xiaoxiao get?

2. $77-33-25$ $96-39-45$ $100-91-8$

3. Clever Dog accidentally smudged the newspaper order table.

	Class 1	Class 2	Class 3	Class 4
Children's News	26		28	34
Little Pictorial	32	37		3
Little Stories	39	40	45	2
Total		98	99	100

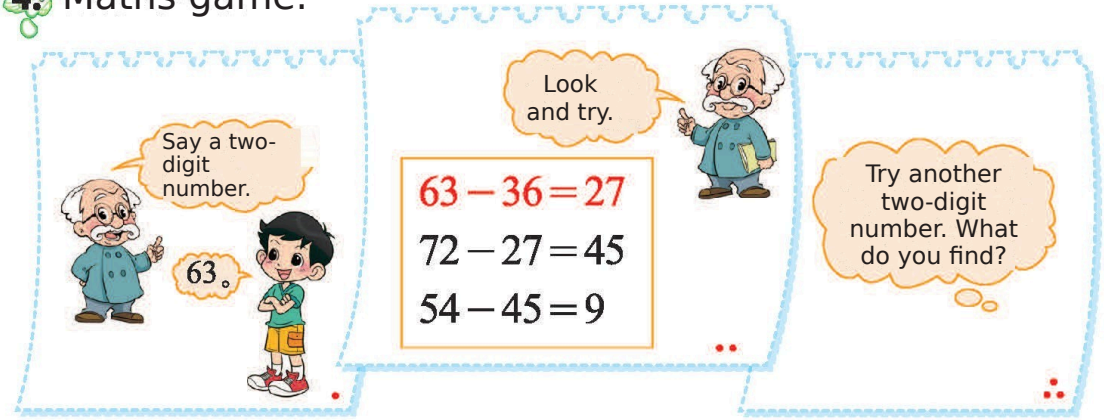
(1) Which class ordered the fewest papers?

(2) How many Children's News did Class 2 order?

(3) How many Little Pictorial did Class 3 order?

(4) How many copies of Little Pictorial did Class 4 order? How many copies of Little Stories?

4. Maths game.



Star Choir

This year 9 people graduated and 15 people joined.

52 people at first

Talk about it. Does the choir have more or fewer members than before?

Fewer members graduated than joined, so...

More joined than left...

How many people are in the choir now?

$15-9=6$(人)

$52+6=58$(人)

$52-9+15=\square$ ( )

$$\begin{array}{r} 52 \\ -\ 9 \\ \hline 43 \end{array} \qquad \begin{array}{r} 43 \\ +\ 15 \\ \hline 58 \end{array}$$

Answer: The choir now has ____ people.

Talk about it, then write a number sentence and calculate.

Taoqi is 8 this year. How old is the aunt?

I'm 29 years older than you.

I am 5 years younger than Uncle.

How many books are there now?

46 books were lent out and 12 returned.

There were 75 books at first.

北京师范大学出版社

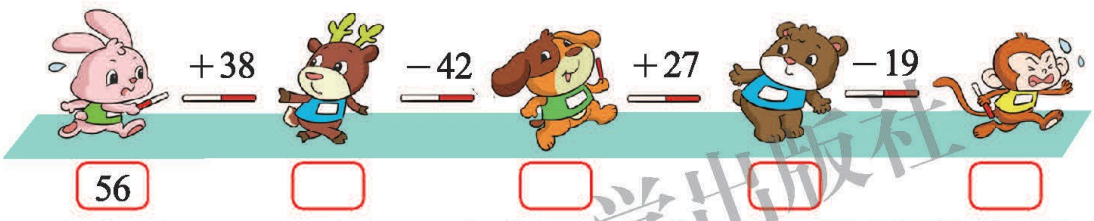
Practice

1.

(1) Talk with your partner. Are there more or fewer people on the bus now?

(2) How many people are on the bus now?

2. Fill in.



3. In art class, the students brought 75 cans in total to make lanterns and sunflowers. They used 35 to make lanterns and 28 to make sunflowers. How many cans are left?

Lanterns

Sunflowers

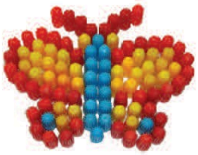
4. How many picture cards does Clever Dog have?

5. A shop had 89 computers. It sold 35 and then received 18 more. How many computers does the shop have now?

Exercise 1

1.

This butterfly is made of marker pen caps.



I used 46 red caps, 34 yellow caps and 16 blue caps.

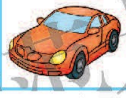
How many caps did Xiaoxiao use?

This owl is made of three kinds of seeds.

I used 80 sunflower seeds, 25 fewer watermelon seeds than sunflower seeds, and 39 fewer pumpkin seeds than watermelon seeds.

How many pumpkin seeds did Taoqi use?

2. Buying toys.

¥45	¥32	¥23	¥85	¥40	¥15

(1) What maths information can you find in the picture?

(2) With ¥100, which two toys would you buy? How much is left?

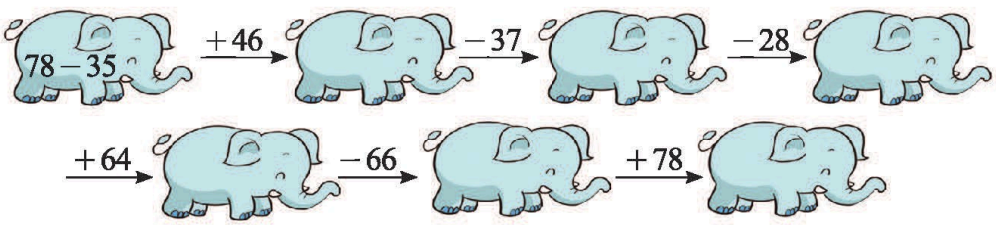
(3) Buying which two toys leaves the most money? How much is left?

(4) Which toys cost exactly ¥100 in all? Give one answer.

3.

$56+21+18$	$48+32-16$	$39-13+47$
$96-34-35$	$57+22-45$	$100-69+25$

4. Fill in and calculate.



5. Harvesting corn.

36 ears	18 ears	45 ears	? ears

(1) and – how many ears of corn did they pick in all?

(2) The goat picked 10 fewer ears than the monkey and the fox together. How many ears did the goat pick?

6. Class 2(1) held a "Be a Little Eco Guardian" activity. The table shows how many used batteries three teams collected last weekend.

Team	Team 1	Team 2	Team 3	Total
Batteries	32	36		95

(1) How many used batteries did Team 3 collect?

(2) Team 4 collected 23 fewer used batteries than Team 1 and Team 2 combined. How many did Team 4 collect?

7.

Name	Round 1	Round 2	Round 3	Total
Taoqi	24	30		90
Xiaoxiao	29	29		94
Qisi	26	30		

(1) How many jumps did Taoqi make in Round 3? What about Xiaoxiao?

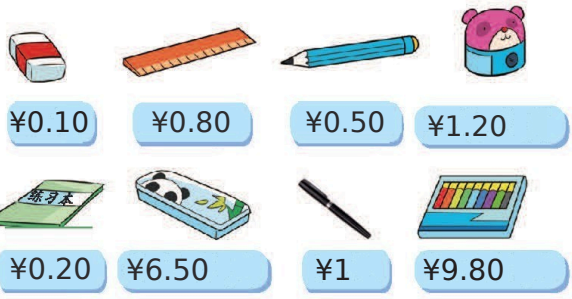
(2) Qisi came second. What might his total score be? How many jumps might he have made in Round 3?

8. Fill in the squares so each row, column and diagonal adds up to 30.

	12	
	10	
		13

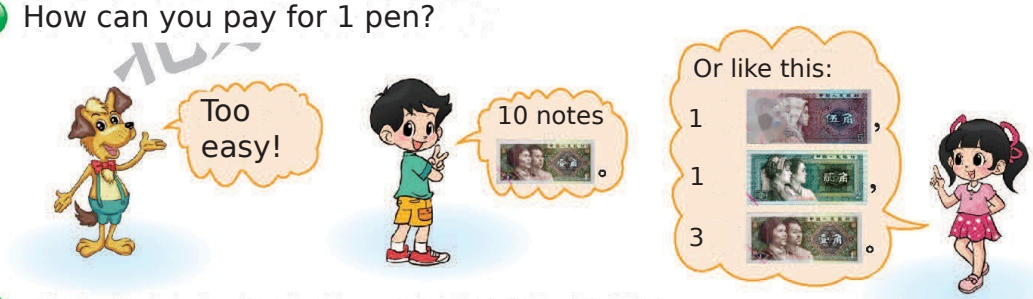
Unit 2 Shopping

Buying Stationery

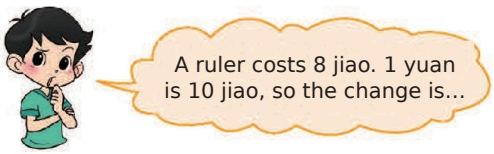


Recognise and fill in.

How can you pay for 1 pen?



You pay ¥1 for 1 ruler. How much change should you get?



Talk with your partner. What can you buy with exactly ¥1?

北京师范大学出版社

Practice

1. Exchange.

(1) __ coins make 1 .

(2) __ notes make 1 .

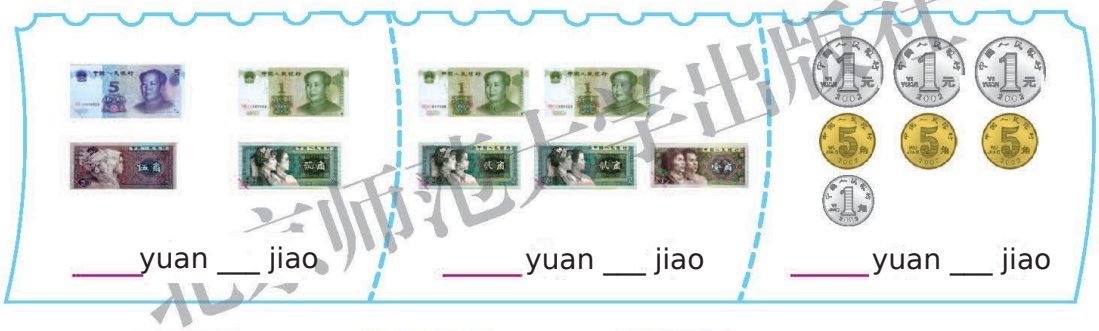
(3) __ notes make 1 .

(4) 1 note is worth ___ .

(5) 1 note is worth ___ , or ___ .

Try it with the money in Appendix 1.

2. Fill in.



_____yuan ___ jiao _____yuan ___ jiao _____yuan ___ jiao

1 note +1 note +1 note = _____yuan

3 notes +1 note = _____yuan

2 notes +3 notes = _____ yuan ___ jiao

3. (1) How can you pay for 1 bottle of ?

(2) You pay ¥2 for 1 bottle of soy sauce. How much change do you get?

(3) Talk with your partner. What can you buy with exactly ¥3?

¥1.50

¥0.75

¥1

北京师范大学出版社

Buying Clothes

- Recognise the notes.

- If Mum buys 1 , how can she pay?

- Ask another maths question and try to answer it.

北京师范大学出版社

Practice

1. Talk about it.

(1) To buy 1 , how can you pay?

(2) To buy 1 and 1 ,

how many yuan do you need?

How would you pay?

2. Fill in.

_____yuan

_____yuan

3. Exchange.

1 = ____ ;

1 = ____ ;

1 = ____ ;

1 = ____ ;

____ and ___

together make 1

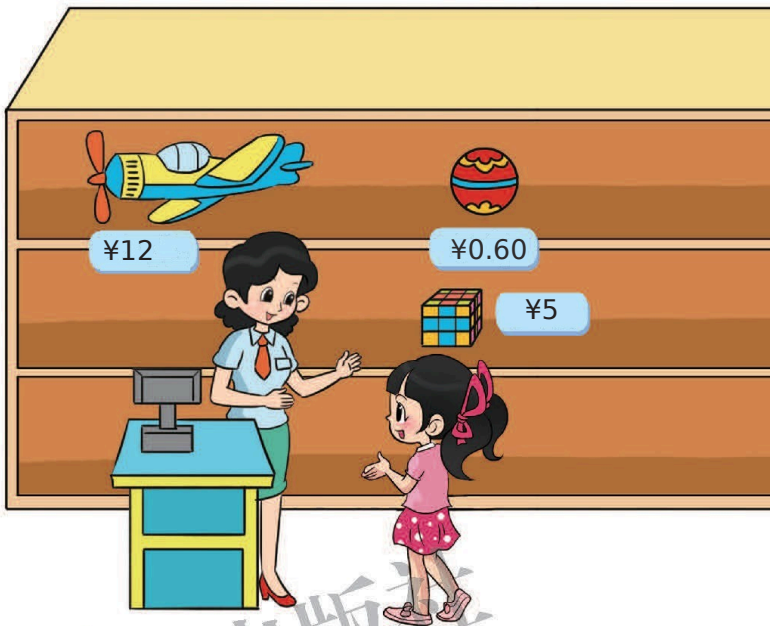
4. You have some of each. How can you make exactly ¥100? Can you write two different ways?

5. Read and tell.

At a press conference, a reporter asked, "How much money does China have in total?" Premier Zhou Enlai humorously replied, "We have 18 yuan 8 jiao 8 fen." In fact, the second series of renminbi in use at that time had 10 denominations: 10 yuan, 5 yuan, 2 yuan, 1 yuan, 5 jiao, 2 jiao, 1 jiao, 5 fen, 2 fen and 1 fen. Added together, they make exactly 18 yuan 8 jiao 8 fen.

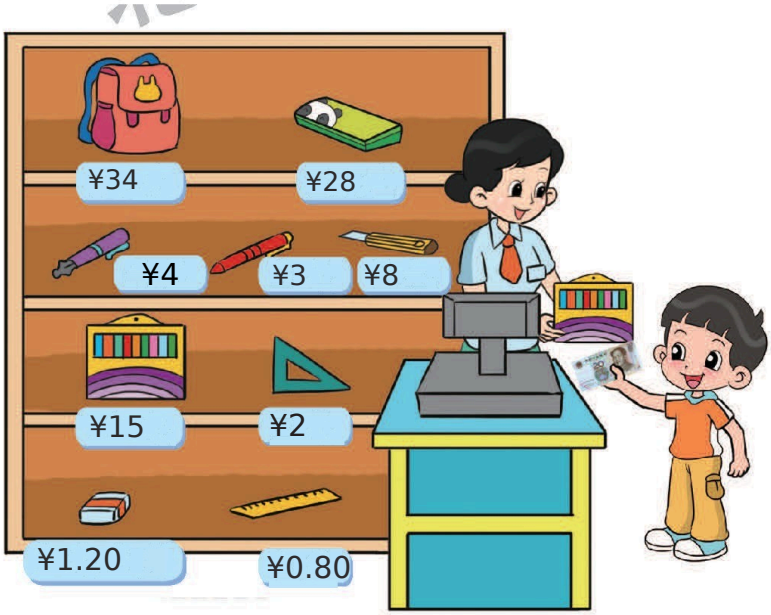
北京师范大学出版

Little Shop

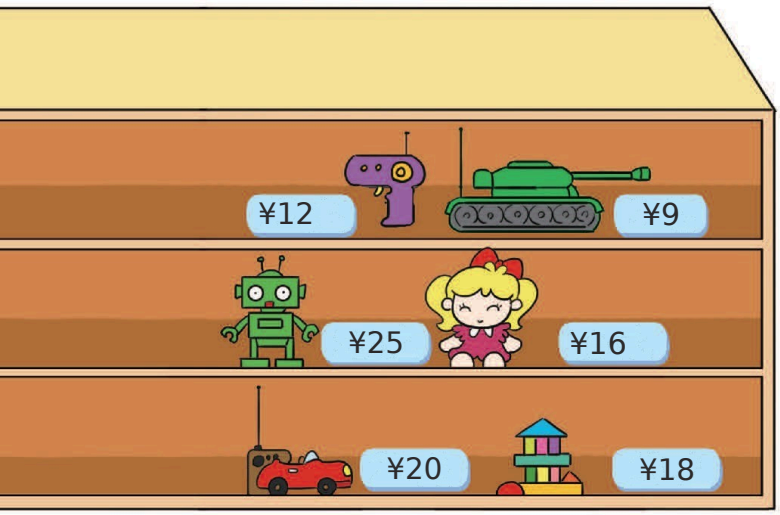


- Xiaoxiao bought 1 and 1 tank.
  How much do they cost in total?

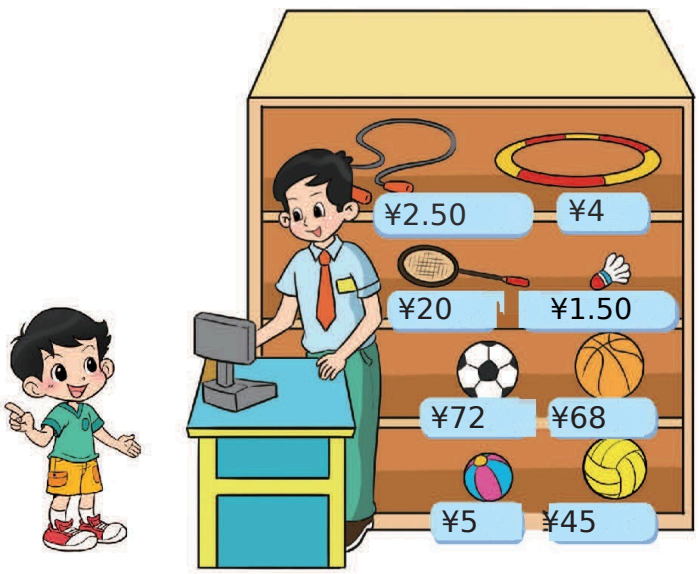
- Qisi gave the shop assistant ¥20 for 1 box of crayons. How much change does he get?



北京大学出版社



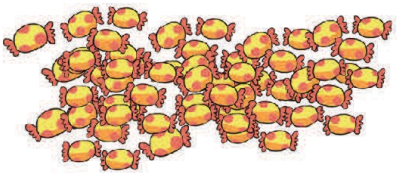
- Taoqi wants to buy . He has 3 ¥1 notes and 2 ¥2 notes. How can he pay?
- vs How much more does the football cost?
- Ask another maths question and try to answer it.

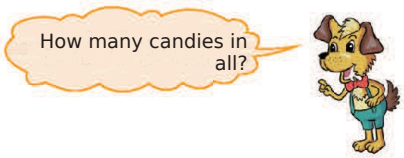


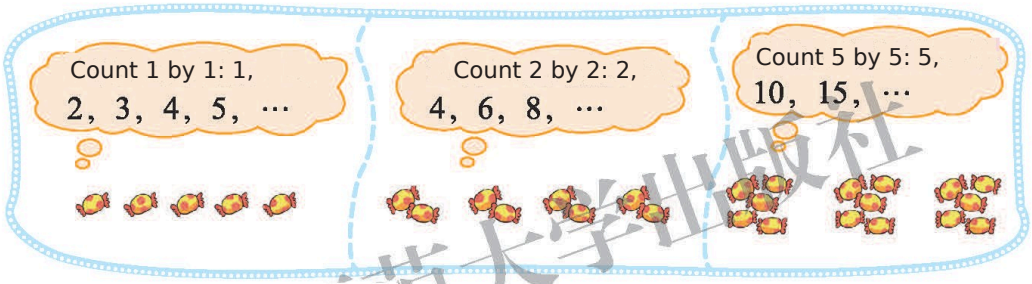
Unit 3 Counting and Multiplication

How Many Candies?

Arrange and count.







Count and fill in.

Each row has ___ candies, and there are ___ rows, so there are ___ candies in total.

Each column has ___ candies, and there are ___ columns, so there are ___ candies in total.

Talk about it and calculate.

Looking across: 5 in each row, 3 rows.

Looking down: 3 in each column, 5 columns.

□+□+□=□ ( )

□+□+□+□+□=□ ( )

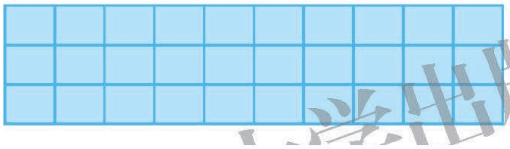
北京大学出版社

Practice

1. Circle and count. How many pandas are there in total?

2. Each plate has ___ cupcakes, ___ plates, ___ cupcakes in all.

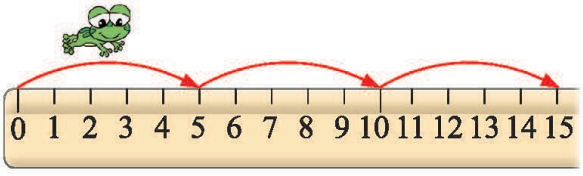
3.



(1) Each row has ___ squares, ___ rows, ___ squares in all.

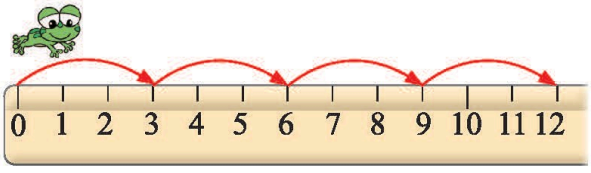
(2) Each column has ___ squares, ___ columns, ___ squares in all.

4. (1) The frog jumps ___ spaces each time, ___ times, ___ spaces in all.



□ + □ + □ = □ ( )

(2) The frog jumps ___ spaces each time, ___ times, ___ spaces in all.



□ + □ + □ + □ = □ ( )

Fun Park

Talk about it. What maths information is in the picture?

There are 4 little planes. Each plane has...

There are 3 people in each boat and 3 boats.

How many people are riding the little planes?

Count: 2, 4, 6, 8. There are 8 people on the little planes.

2+2+2+2=8 (people)

Answer: ___ people ride the little planes.

Let's learn.

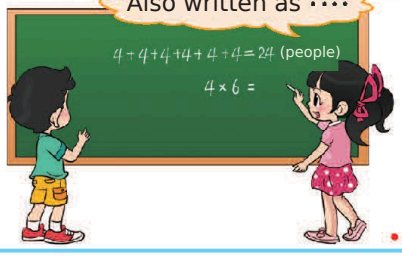
2 added 4 times can also be written as multiplication.

2	×	4	=8(people)
4	×	2	=8 (people)
⋮	⋮	⋮	⋮
factor	sign	factor	product

2×4 is read as 2 times 4. 4×2 is read as 4 times 2.

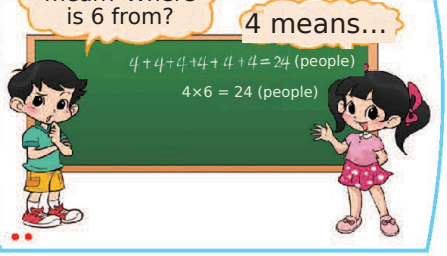
How many ride the train?

Also written as ····



What does 4 mean? Where is 6 from?

4 means...



Hey, multiplication is so handy!

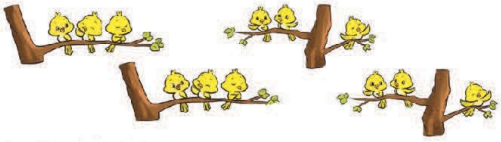
Answer: ___ people ride the train.

北京师范大学出版社

Practice

1.

(1) How many birds in all?



Addition: _____

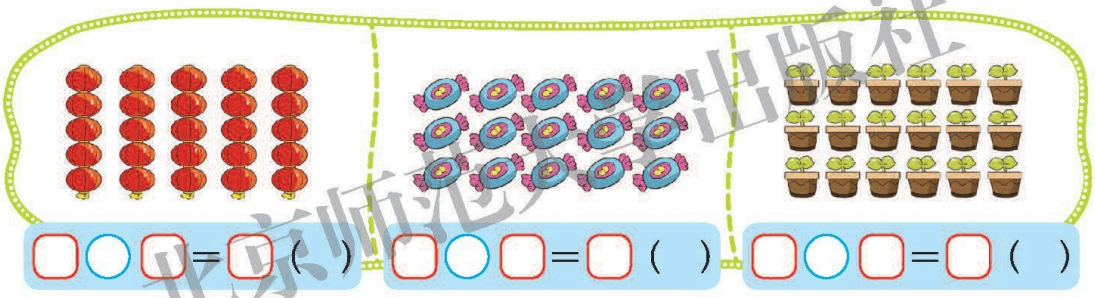
Multiplication: □ × □ = □ ( )

(2) How many dwarves in all?

Addition: _____

Multiplication: □ × □ = □ ( )

2. Look at the pictures and write multiplication number sentences.



□ ○ □ = □ ( ) □ ○ □ = □ ( ) □ ○ □ = □ ( )

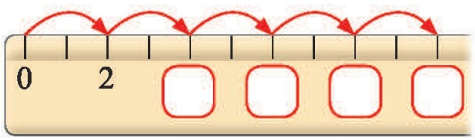
北京师范大学出版社

3. Fill in.

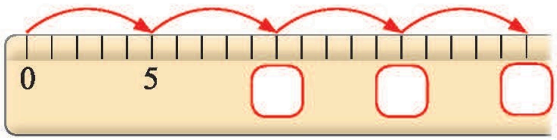
(1) Write 4+4+4=12 as multiplication: □ × □ = □

(2) Write 2+2+2+2+2+2=12 as multiplication: □ × □ = □

4. Fill in and calculate.



□ × □ = □ ( )

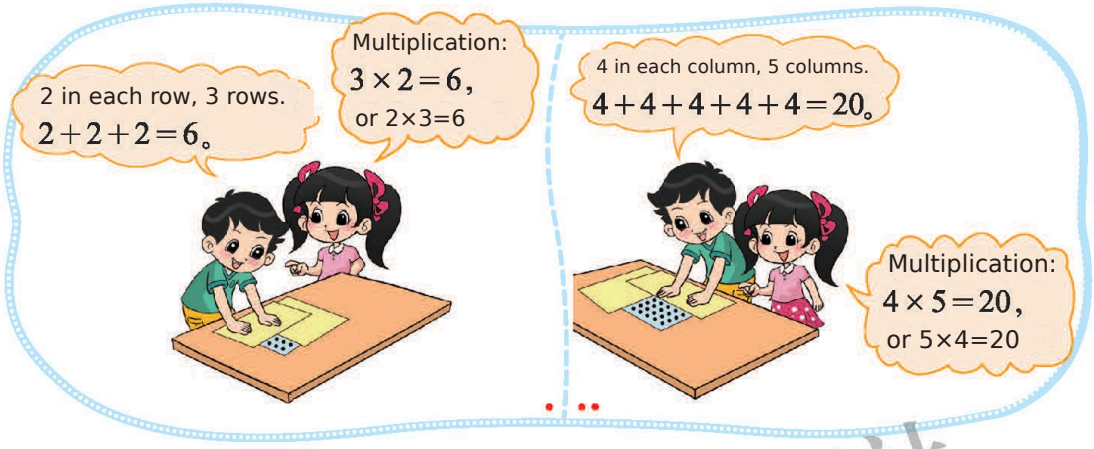


□ × □ = □ ( )

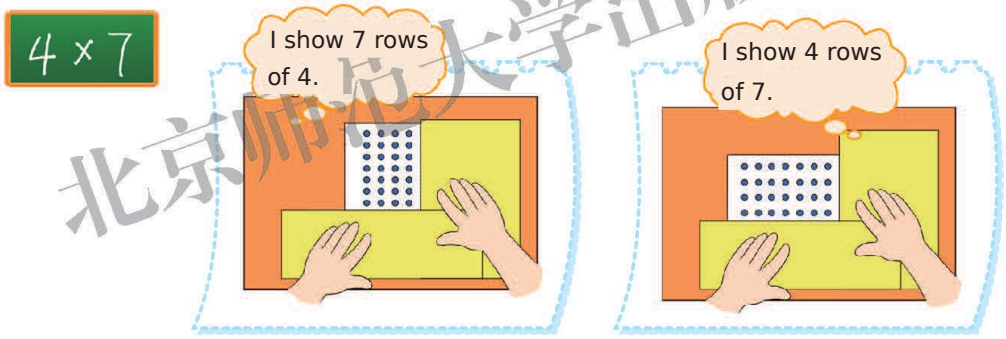
5. Rewrite the addition sentences on pages 16 and 17 as multiplication sentences.

How Many Dots?

Do the same on the dot grid in Appendix 2 and talk about it.

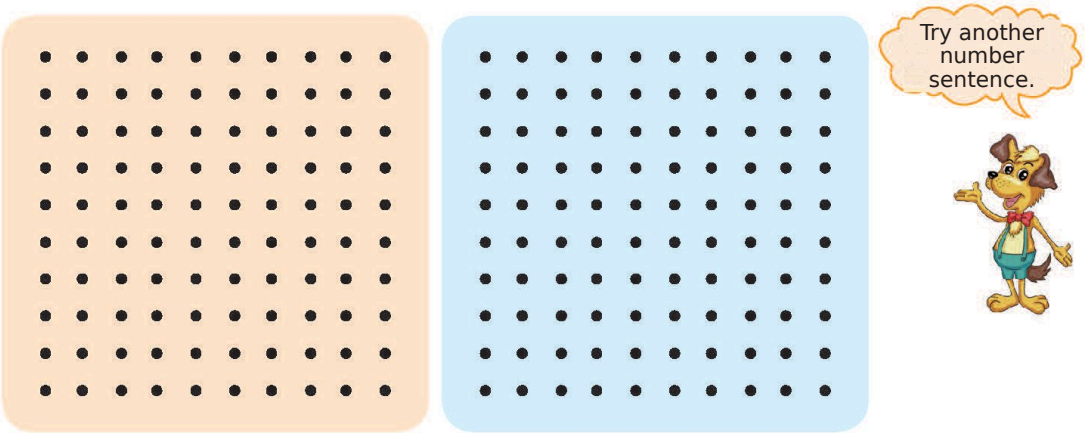


Think and arrange.



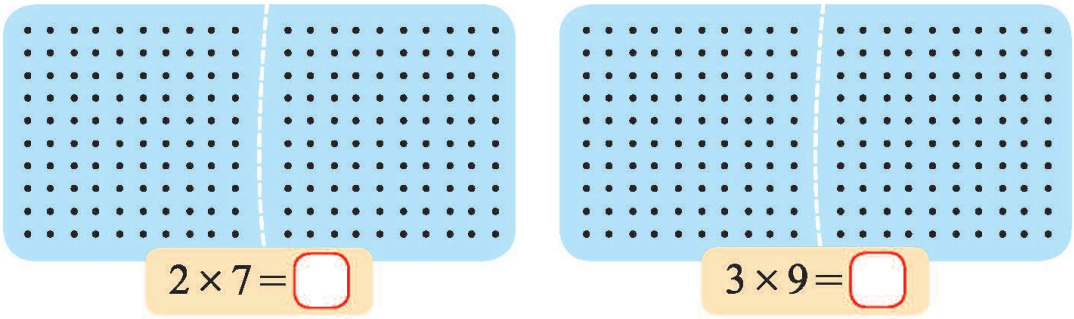
北京师范大学出版社

Circle the dots to show 3×8 in two ways.

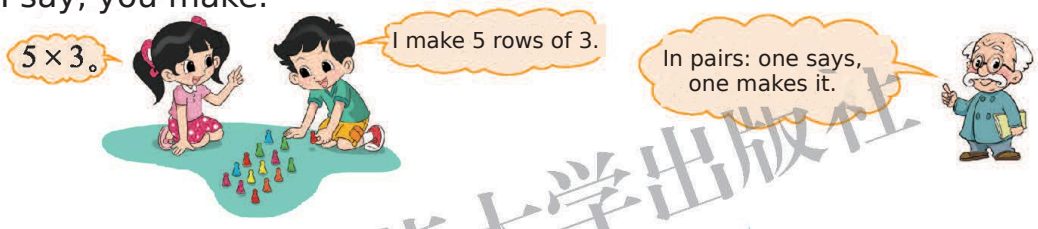


Practice

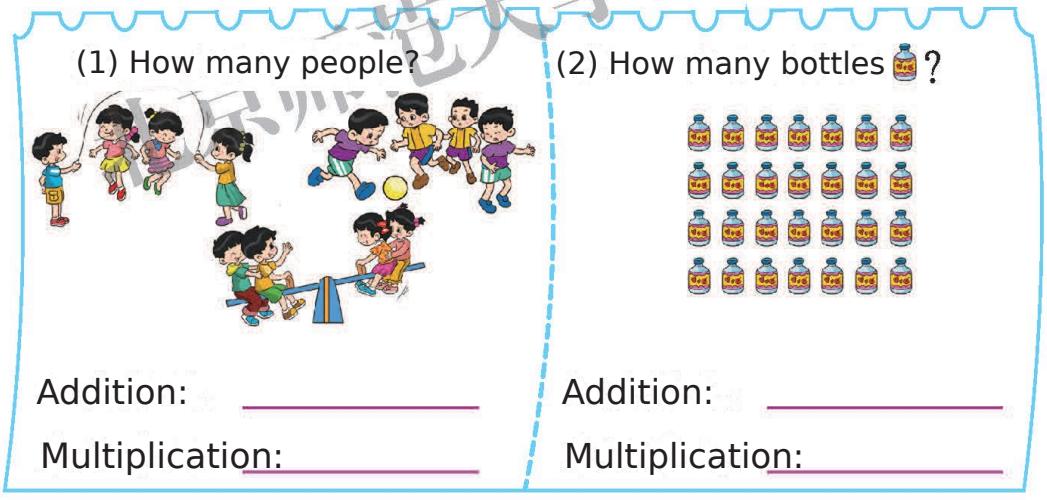
1. Show each number sentence on the dot grids in two ways.



2. I say, you make.



3.

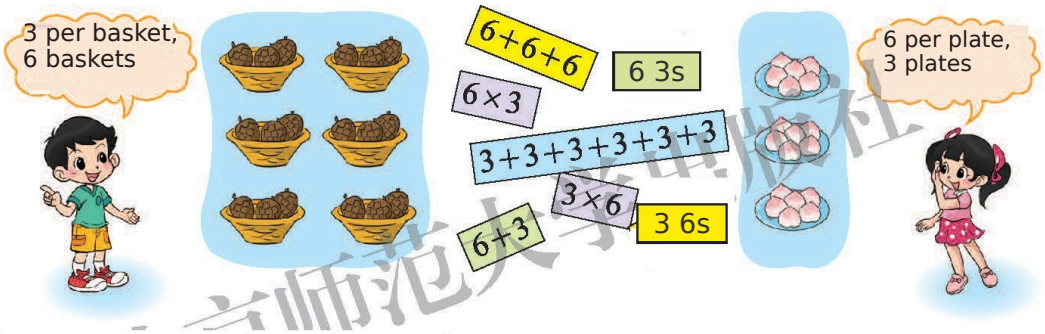


4.

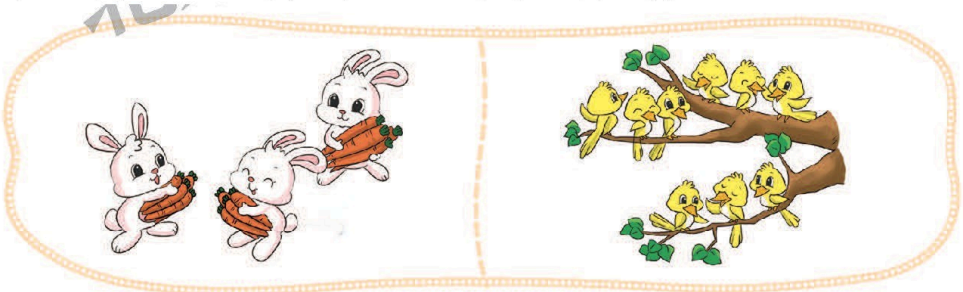
北京师范大学出版社

Animal Party

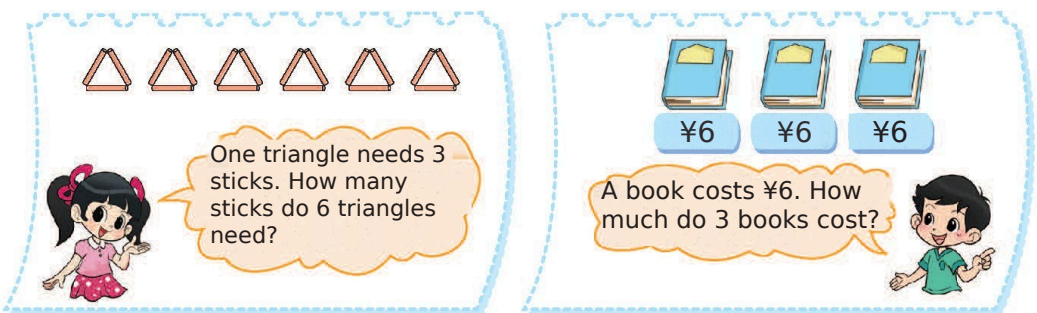
Think and match.



Look and talk about it. What number sentences can you think of?

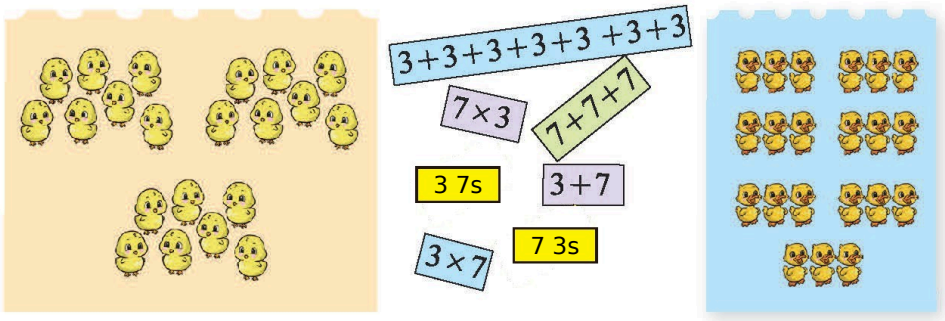


Think: what other everyday problems can you solve with 3×6?

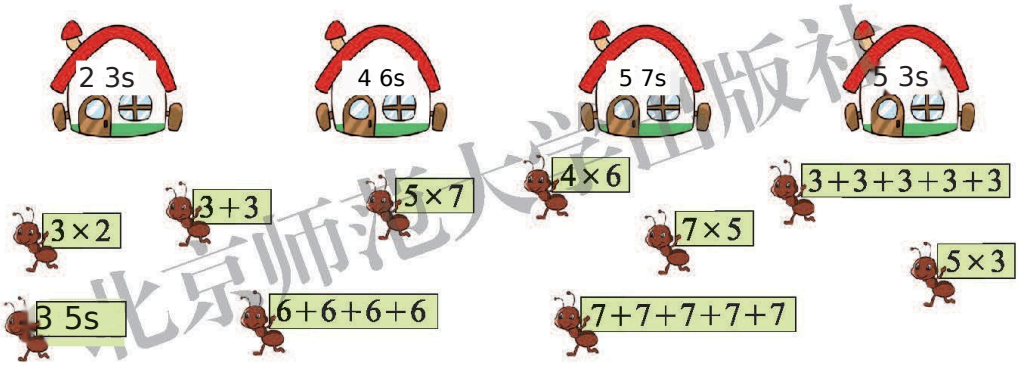


Practice

1. Think and match.



2. Help the little ants get home.



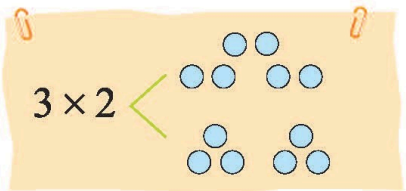
北京师范大学出版社

3.

(1) How many toothpicks were used altogether to make the little umbrellas?

(2) Ask another maths question and try to answer it.

4. Draw and explain.



4×3

4×6

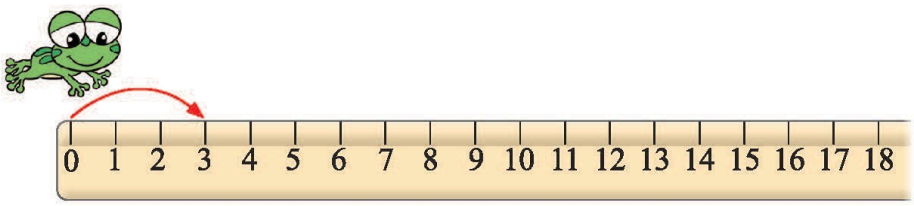
2×5

5×4

5. Give two problems that can be solved with 5×2.

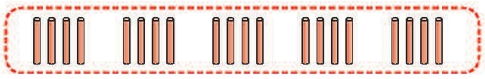
Exercise 2

1. Draw and explain.



1 jump = 3 spaces, 2 jumps = ☐, 3 jumps = ☐, 6 jumps = ☐ spaces.

2. Arrange and fill in.



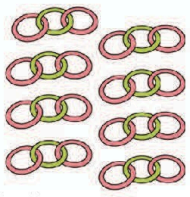
☐+☐+☐+☐+☐=☐, ☐ lots of ☐ make ☐.

☐×☐=☐

3. Look and fill in.

Addition: _____

Multiplication: _____



Addition: _____

Multiplication: _____

4. Rewrite each addition as a multiplication sentence.

3+3+3+3+3=15

☐×☐=☐

5+5+5=15

☐×☐=☐

9+9=18

☐×☐=☐

7+7+7=21

☐×☐=☐

6+6+6+6=24

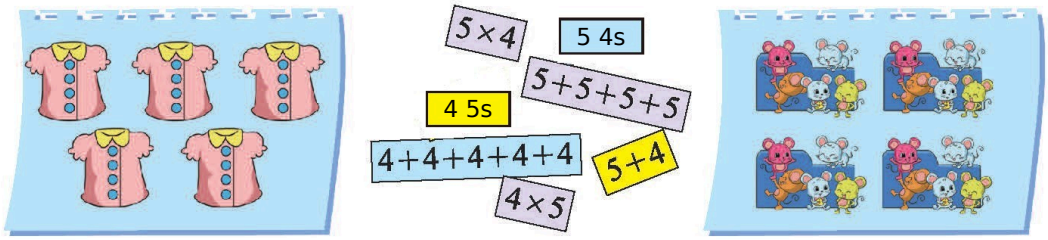
☐×☐=☐

8+8+8=24

☐×☐=☐

北京师范大学出版社

5. Think and match.



6. Draw and count.

$3 \times 4 = \square$

$5 \times 6 = \square$

7. Explain and fill in.

8. How many of each did they buy?

9. Think and fill in.

(1) ★+★=12 ▲+▲+▲+▲=12

★= ( ) ▲= ( )

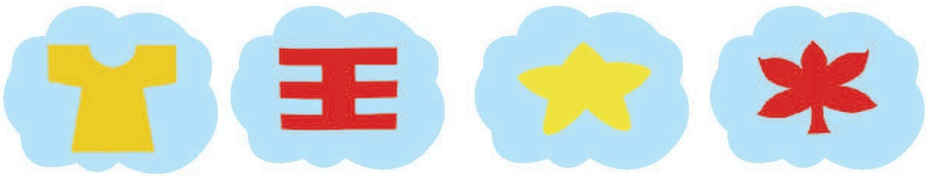
(2) ☺+☺+☺=12 ☆+☆+☆+☆+☆+☆=12

☺= ( ) ☆= ( )

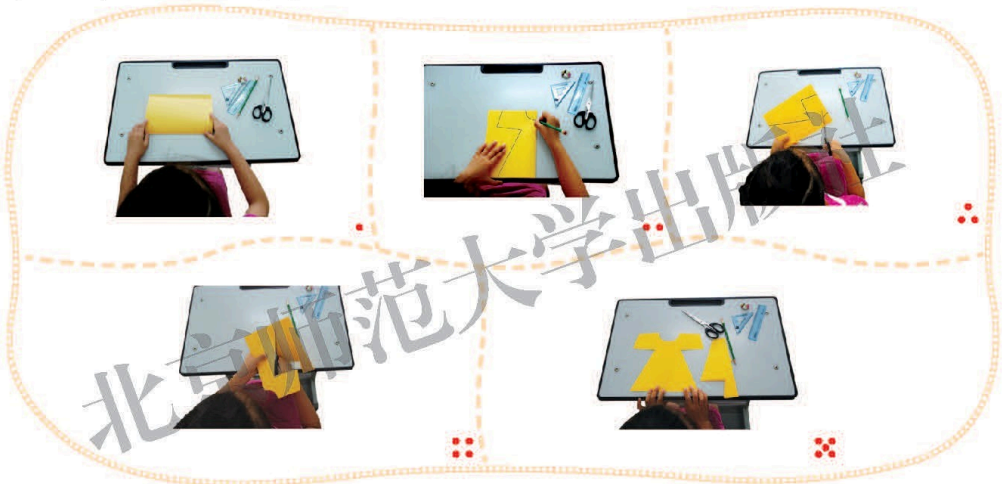
Unit 4 Changes in Shapes

Fold and Make

Taoqi and Xiaoxiao cut out some pretty patterns in craft class.



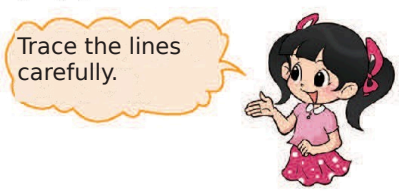
Can you cut out?



北京师范大学出版社

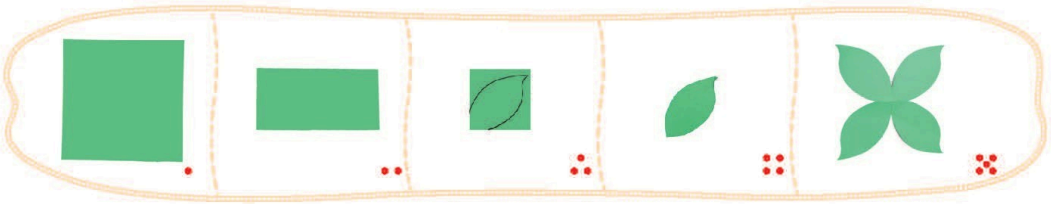
Find a way to make the patterns above.

Talk about it: what should you watch out for?



Practice

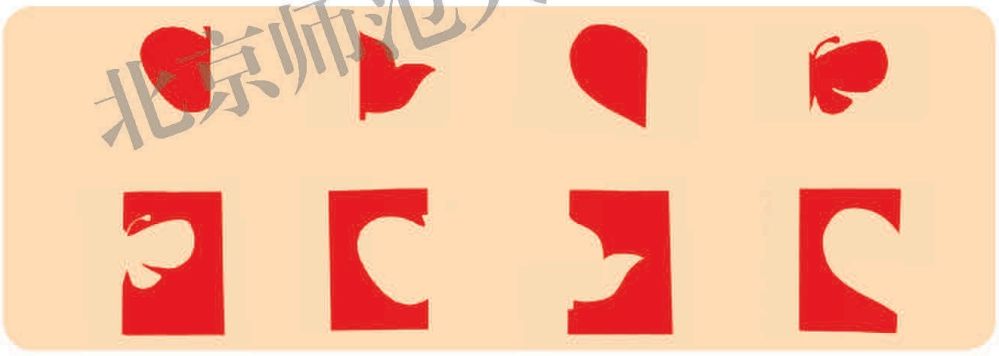
1. Take 1 square sheet of paper and do as shown.



2. How do you cut out the patterns below? Explain and do it.

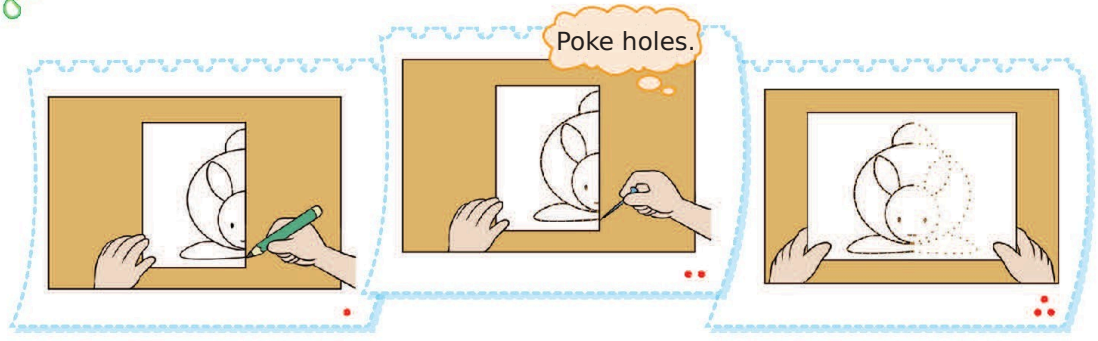
3. $92-76+35$ $27+37+26$ $89-35+22$

4. The top-row patterns are cut from the bottom-row paper. Match them.



Can you cut them out?

5. Look and try.



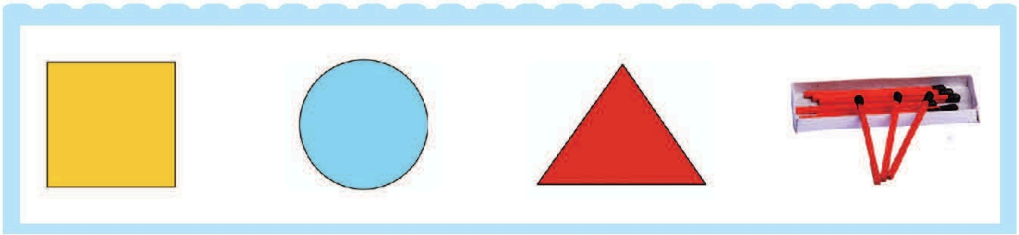
北京师范大学出版社

Play and Make

Think: how can you move the pieces so that Cao Cao escapes from Huarong Pass? Try it with Figure 1 in Appendix 3.

The Huarong Pass game comes from a famous Three Kingdoms story. Beaten by Liu Bei and Sun Quan, Cao Cao fled to Huarong Pass and ran into Guan Yu's ambush. To repay Cao Cao's past kindness, Guan Yu let him go.

Use each cardboard shape below and a matchstick to make a spinning top.

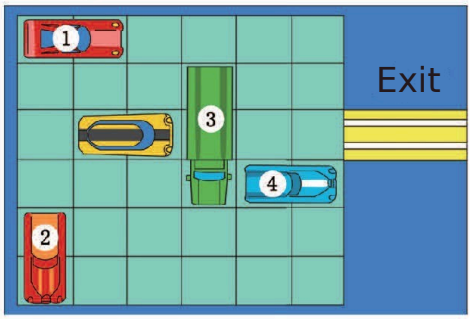


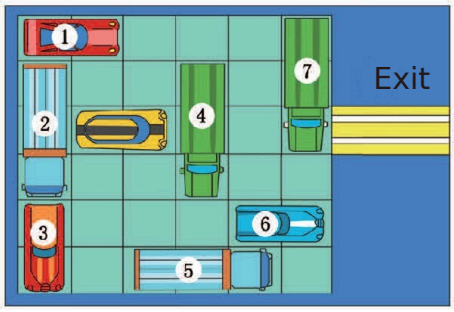
北京师范大学出版社

Practice

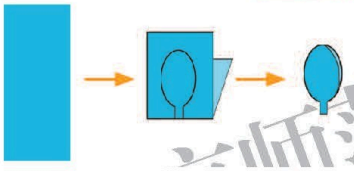
1. All cars can only move forwards or backwards.

Think: how can get out through the exit?

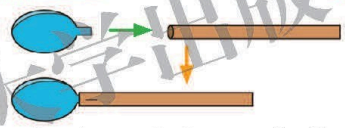




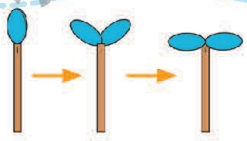
2. The bamboo dragonfly is a toy people in ancient China loved. Look and make one.



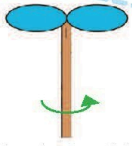
Cut the wings out of cardboard.



Push one end of the wings into the straw and fix them with a staple.



Open the wings out and press them flat. The dragonfly is ready.



Spin the straw one way and the dragonfly flies up.

3. $28+34+22$ $75-28-19$ $94-58-19$

4. Make a pinwheel and play with it.

Unit 5 Multiplication Facts for 2–5

Count Pinecones

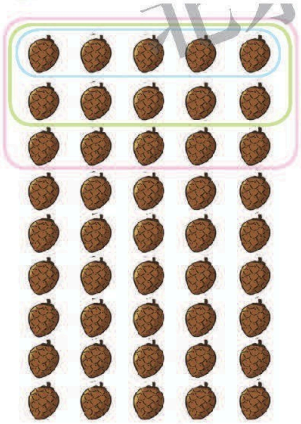
Count and fill in. How many in 1 pile of ? And 2 piles?

You can lay out counters instead of pinecones.

Let's record as we count.

Piles	1	2	3	4	5	6	7	8	9
Pinecones	5	10	15						

Calculate and discuss.



$1 \times 5 = 5$ 1 × 5 = 5

$2 \times 5 = 10$ 2 × 5 = 10

$3 \times 5 = 15$ 3 × 5 = 15

$4 \times 5 =$ ____ 4 × 5 = ____

$5 \times 5 =$ ____ 5 × 5 = ____

$5 \times 6 =$ ____ 5 × 6 = ____

$5 \times 7 =$ ____ 5 × 7 = ____

$5 \times 8 =$ ____ 5 × 8 = ____

$5 \times 9 =$ ____ 5 × 9 = ____

Our ancestors passed down these multiplication facts more than 2,000 years ago. They are easy to say, and very useful to remember!

Think: how can you remember the facts for 5?

Just remember 5 × 6 = 30, then add one more 5 to get 5 × 7 = 35.

In each fact, the answer ends in 5 or 0.

北京师范大学出版社

Practice

1.

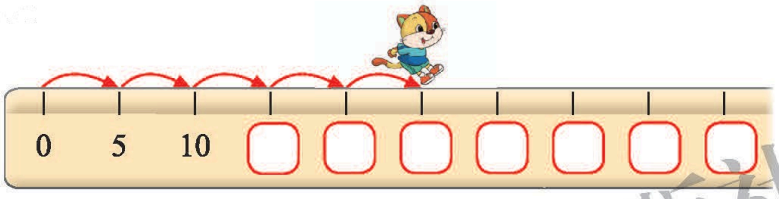
(1) How many cups in all?

□ ○ □ = □ ( )

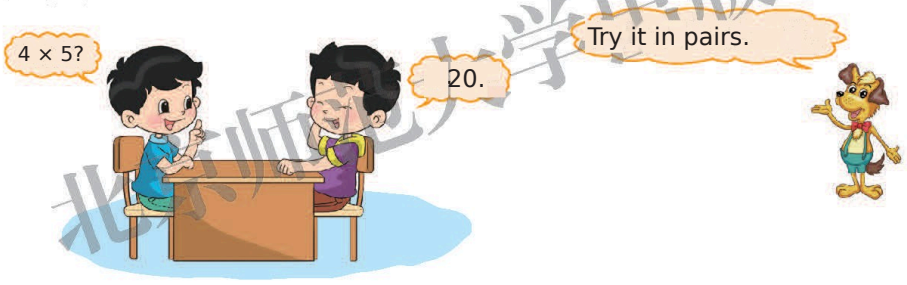
(2) How many buttons in all?

□ ○ □ = □ ( )

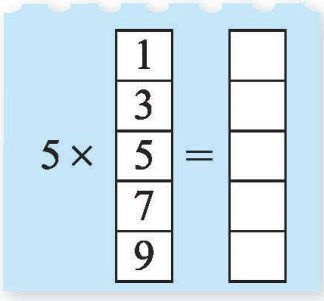
2. Fill in.

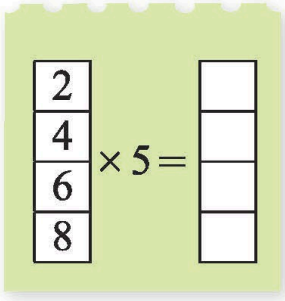


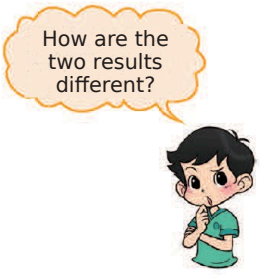
3. Ask and answer.



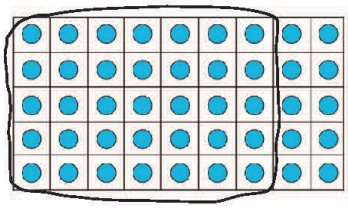
4. Fill in.





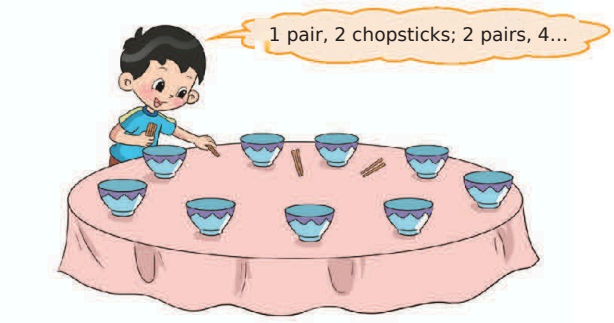


5. First circle groups in the picture, then count and explain.



北京师范大学出版社

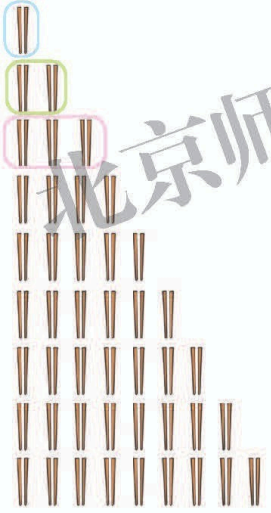
Chores



Lay out sticks and fill in. How many chopsticks in 1 pair? In 2 pairs?

Pairs	1	2	3	4	5	6	7	8	9
Chopsticks	2	4	6						

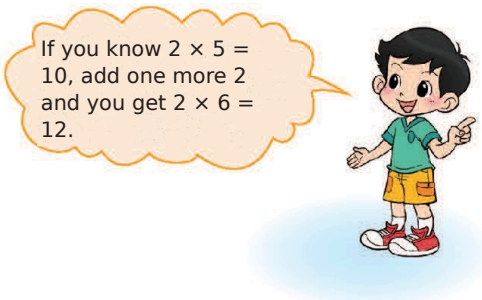
Can you make up the multiplication facts for 2?



$1 \times 2 = 2$	1 × 2 = 2
$2 \times 2 = 4$	2 × 2 = 4
$2 \times 3 = 6$	2 × 3 = 6
$2 \times 4 =$ ____	2 × 4 = ____
$2 \times 5 =$ ____	2 × 5 = ____
$2 \times 6 =$ ____	2 × 6 = ____
$2 \times 7 =$ ____	2 × 7 = ____
$2 \times 8 =$ ____	2 × 8 = ____
$2 \times 9 =$ ____	2 × 9 = ____

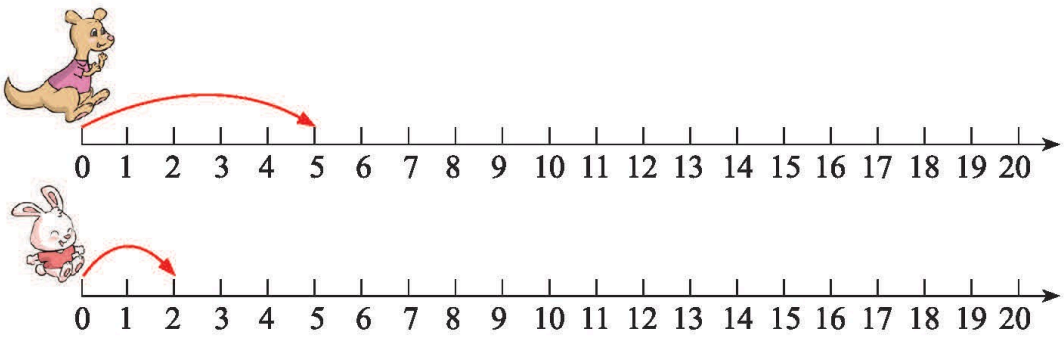
北京师范大学出版社

Think: how can you remember the facts for 2?



Practice

1. Draw.



2. 1, 2, ..., 9: multiply each number by 2 and circle the answers.

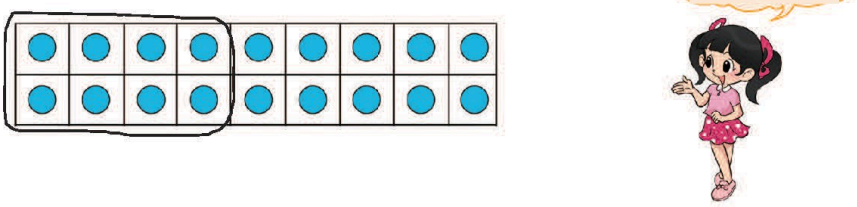
1	②	3	④	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20

3. Say it, then do it.

4.

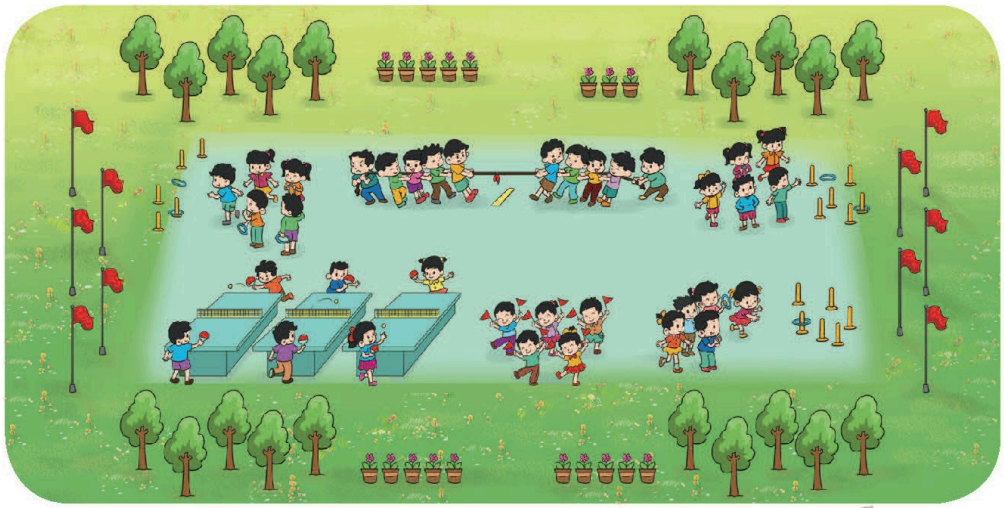
3 × 2 =	5 × 2 =	5 × 7 =	6 × 2 =
2 × 7 =	4 × 5 =	9 × 2 =	2 × 8 =
5 × 3 =	8 × 5 =	2 × 4 =	9 × 5 =

5. First circle groups in the picture, then count and explain.

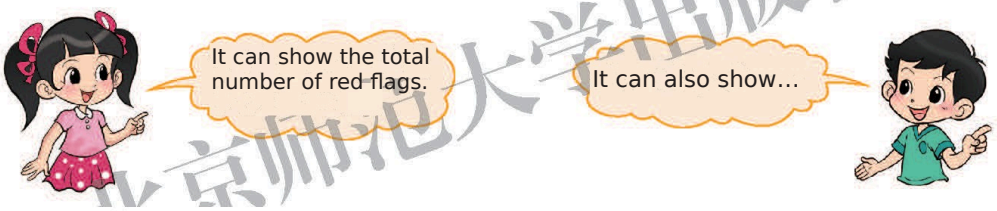


北京师范大学出版社

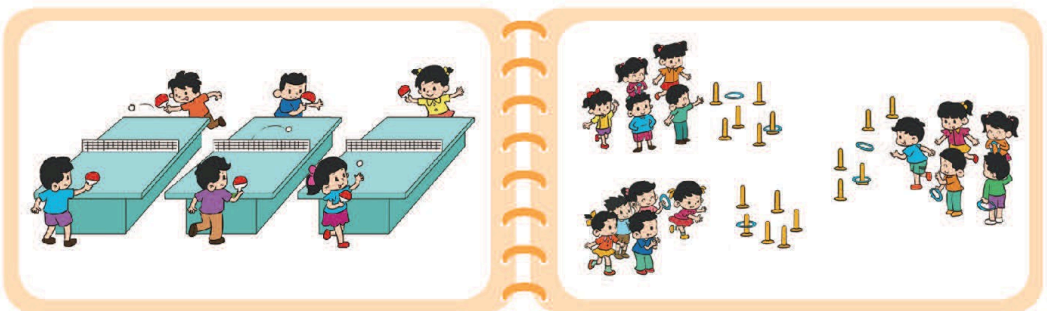
Break Time



Discuss: what playground problems can 5×2 solve?



Talk about it and calculate.



How many pots of flowers are there in total?

Look at your break-time activities. Are there any problems you can solve with multiplication?

北京师范大学出版社

Practice

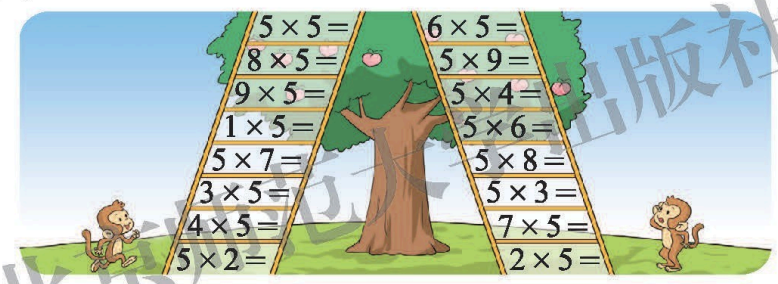
1. Look, discuss and calculate.

How many dancers?

How many drummers?

How many singers?

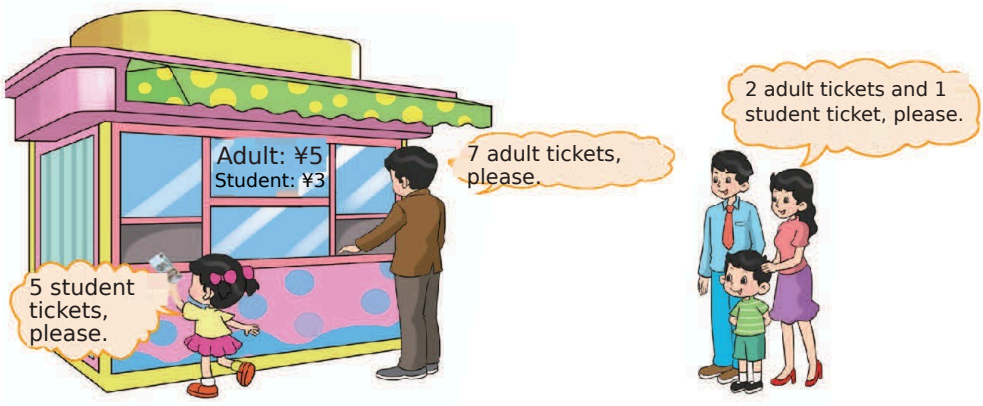
2. Calculate.



3. Fill ◯ with “>” “<” or “=”.

5×7 ◯ 36	30 ◯ 5×6	9×5 ◯ 5×9	5×5 ◯ 5+5
6×2 ◯ 10	2×8 ◯ 3×5	4×5 ◯ 9×2	9×2 ◯ 9+9

4. How much should each of them pay?



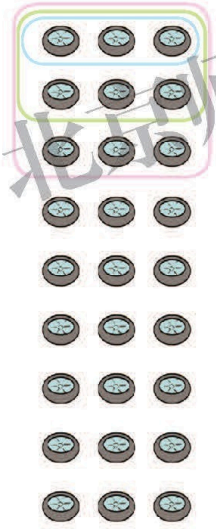
How Many Wheels?

1 tricycle: 3 wheels
2 tricycles: 6 wheels
3 tricycles: 9 wheels
.....

Lay out counters and fill in. How many wheels on 1 tricycle? On 2?

Tricycles	1	2	3	4	5	6	7	8	9
Wheels	3	6	9						

Can you make up the multiplication facts for 3?



$1 \times 3 = 3$ 1 × 3 = 3

$2 \times 3 = 6$ 2 × 3 = 6

$3 \times 3 = 9$ 3 × 3 = 9

$3 \times 4 =$ ____ 3 × 4 = ____

$3 \times 5 =$ ____ 3 × 5 = ____

$3 \times 6 =$ ____ 3 × 6 = ____

$3 \times 7 =$ ____ 3 × 7 = ____

$3 \times 8 =$ ____ 3 × 8 = ____

$3 \times 9 =$ ____ 3 × 9 = ____

Think: how can you remember the facts for 3?

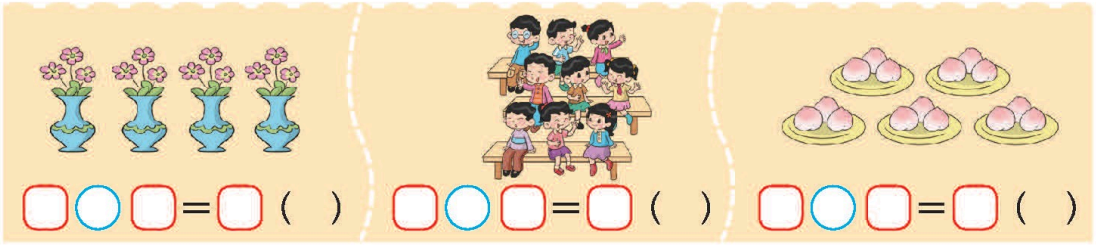
Each answer is 3 more than the one before.

A Chinese saying uses "3 × 7 = 21". Knowing 3 × 7 = 21, I know 3 × 6 = 18.

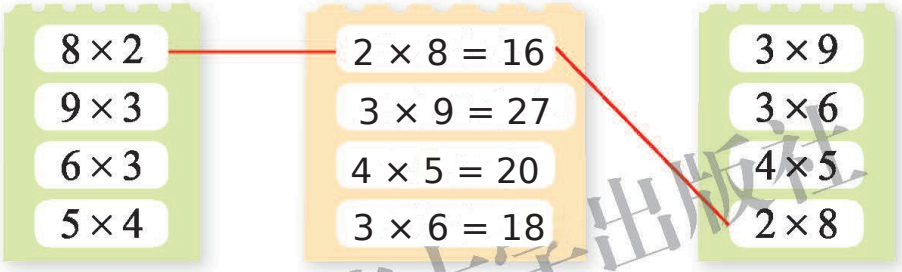
北京师范大学出版社

Practice

1. Look, discuss and fill in.



2. Find the pairs.



3. Find the pattern and fill in.

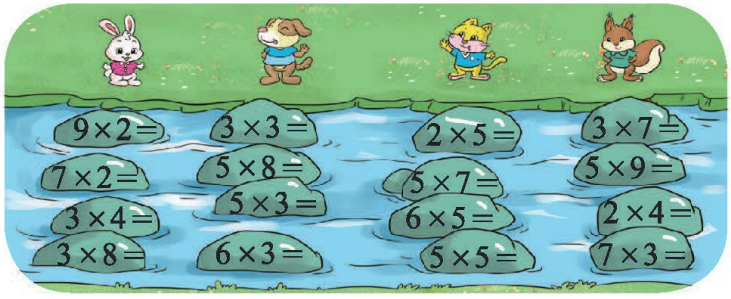
(1) 10, 15, 20, ____, ____。

(2) 18, 16, 14, ____, ____。

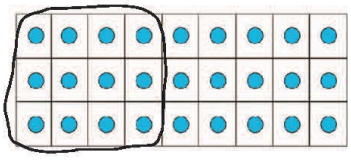
(3) 9, 12, 15, ____, ____。

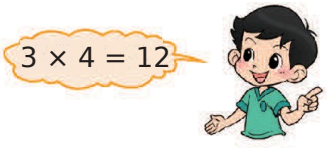
(4) 27, 24, 21, ____, ____。

4. Cross the river.



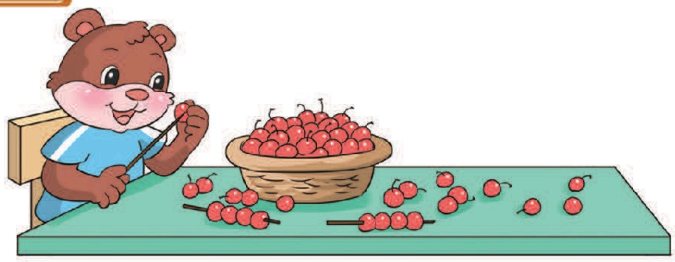
5. First circle groups in the picture, then count and explain.





北京师范大学出版社

Bear's Treat



Count and fill in. How many red berries are on 1 skewer? On 2 skewers?...

Skewers	1	2	3	4	5	6	7	8	9
Berries	4	8	12						

Can you make up the multiplication facts for 4?

$1 \times 4 = 4$ 1 × 4 = 4

$2 \times 4 = 8$ 2 × 4 = 8

$3 \times 4 = 12$ 3 × 4 = 12

$4 \times 4 =$ ____ 4 × 4 = ____

$4 \times 5 =$ ____ 4 × 5 = ____

$4 \times 6 =$ ____ 4 × 6 = ____

$4 \times 7 =$ ____ 4 × 7 = ____

$4 \times 8 =$ ____ 4 × 8 = ____

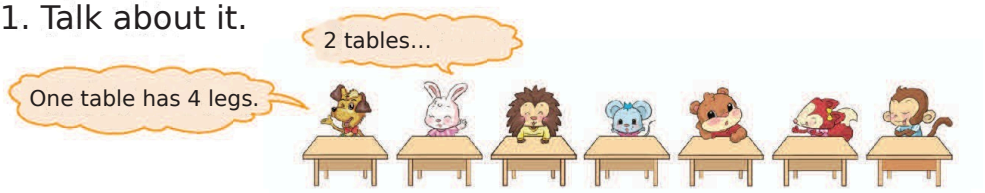
$4 \times 9 =$ ____ 4 × 9 = ____

Which multiplication fact do you find hard to remember?

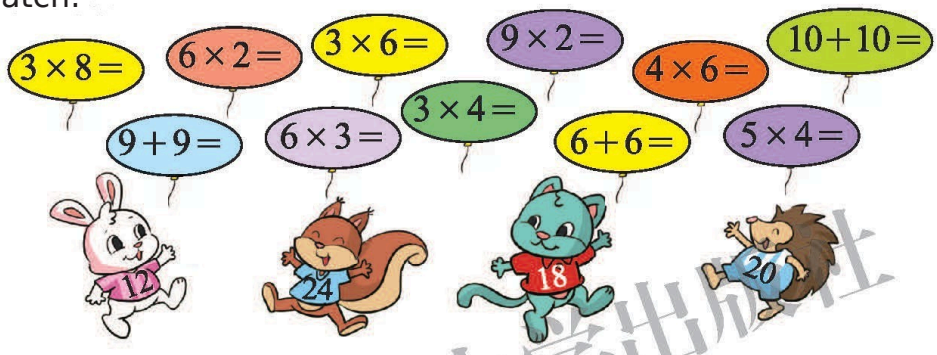
北京师范大学出版社

Practice

1. Talk about it.



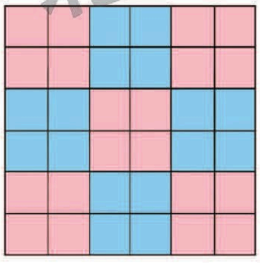
2. Match.



3.

2×4=	3×9=	6×4=	7×4=
8×4=	9×4=	7×3=	4×1=

4.



(1) There are ▢ of these.

▢○▢=▢ ( )

(2) There are ▢ of these.

▢○▢=▢ ( )

5. Find the pattern and walk the maze.

5×7=	3×9=	7×2=	5×2=	5×6=
3×8=	2×6=	4×5=	6×4=	2×8=
3×2=	3×4=	4×4=	7×4=	4×8=
4×1=	4×2=	3×7=	5×5=	9×4=

北京师范大学出版社

Going Home

Talk about it. What maths information can you find in the picture?

How many kittens are on the boat in all? Talk about it and work it out.

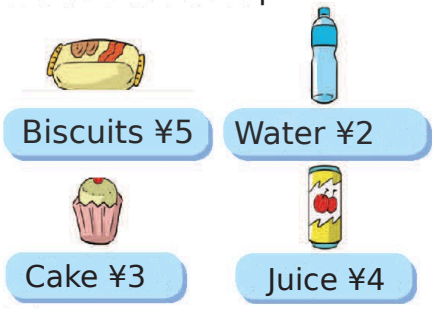
□○□=□ ( )

Answer: There are ____ kittens on the boat in all.

Talk about it. What problem can the number sentence 2×6=12 solve?

Practice

1. Answer from the picture.



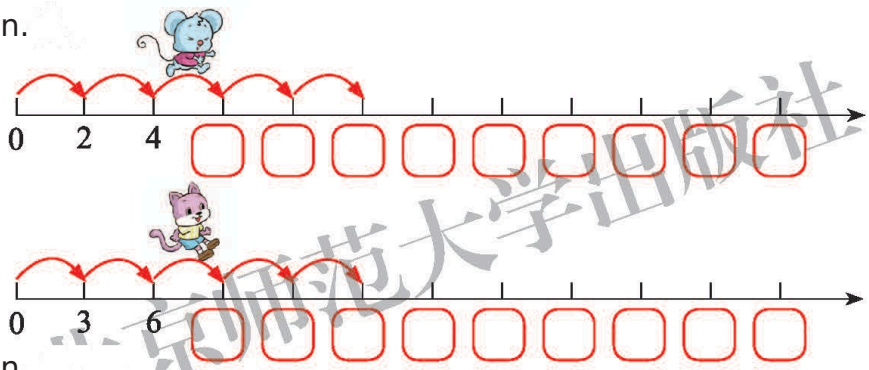
(1) Talk about it. What maths information is in the picture?

(2) How much do 7 bottles of water cost?

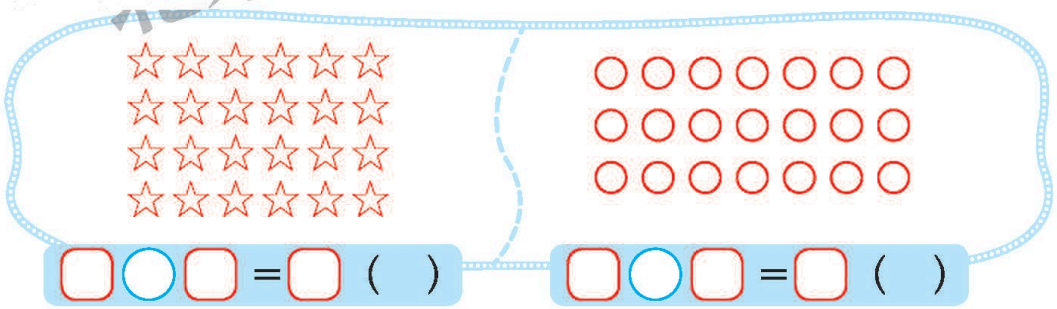
(3) What problem can 5 × 3 = 15 solve?

(4) Ask another multiplication question and try to answer it.

2. Fill in.



3. Fill in.



4.

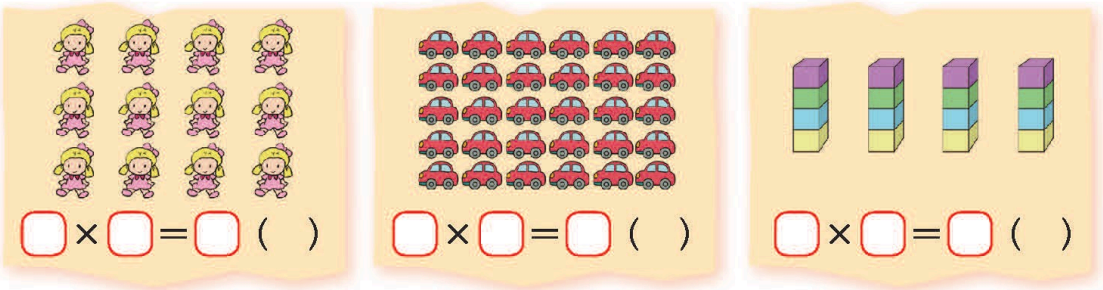
Each floor is about 3 m high. About how tall is the building?

1 cable car seats 2 people. How many can 7 cable cars seat in all?

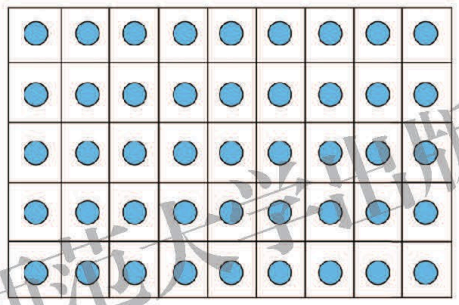
北京师范大学出版社

Exercise 3

1. Fill in.



2. Use the dot grid to say the 2, 3, 4 and 5 times tables.



北京师范大学出版社

3.

2×5=	9×3=	8×5=	1×5=
4×1=	3×6=	4+4=	3×8=
5×3=	2×9=	2×7=	7×3=
8×3=	7×4=	2×8=	8+1=

4. Fill in.

×	1	2	3	4	5	6	7	8	9
2	2								
3				12					
4									
5									

5. Find a new home.

6. Some prices at the Blue Cat Store:

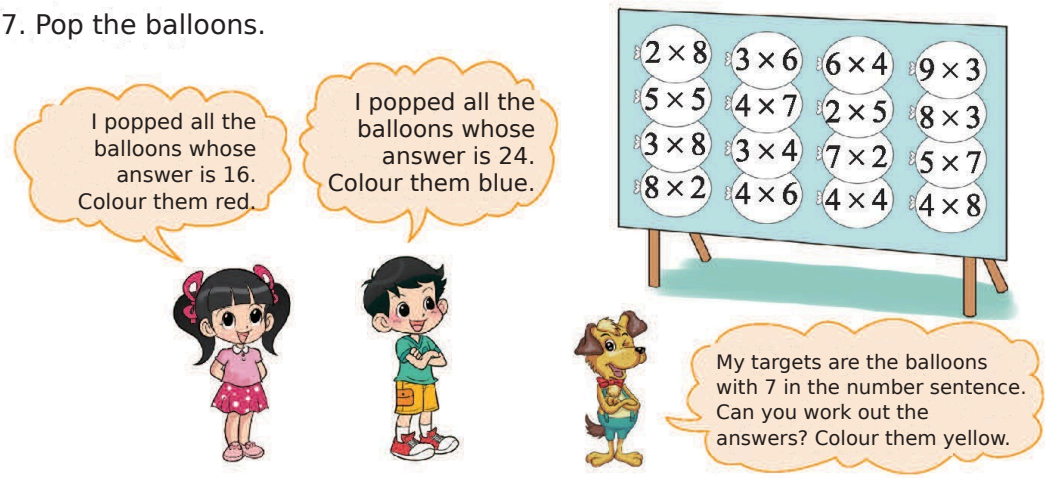
(1) Teacher Li bought 8 . How much was that in total?

(2) Teacher Zhang bought 7 . How much was that in total?

(3) Teacher Wang has ¥40 and wants 4 . Is that enough?

(4) Pose another maths question and try to answer it.

7. Pop the balloons.



浙江大学出版社

Summary and Review

What I Learned

Field Trip

Class 2(1)	Class 2(2)	Class 2(3)
32 people	29 people	34 people

1 bottle of water each. How many bottles are needed?

Each person gets 1 bun. We have already bought 35 red bean buns and 26 wheat buns. How many plain buns do we still need to buy?

Work with a partner to make up a similar problem and solve it.

Buying Prizes

The storytelling group has a contest next week. The teacher asked me to buy prizes with ¥10. What can I buy?

¥0.80

¥1.50

¥0.50

¥2

Choose one of the items above and say how you can pay for it.

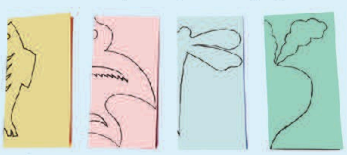
Place and Say

Place counters and say the multiplication facts for 2, 3, 4 and 5.

Talk and draw: what problems can 4×6 solve?

Crafts

Choose a pattern you like.
Fold, draw and cut it out.



Think: what will the other three patterns look like when cut out?

Use what you have learned to make something new, and say how you made it.

北京...出版社

My Progress

I have learned that when I don't understand a question, I can read it a few more times.

I used to just recite the multiplication facts. Now I can make them up myself. For example...

The maths activity I remember best is the shopping activity. Now I know how to change money. For example...

I like paper cutting. I can cut out shapes whose two sides match exactly. They look beautiful.

My Questions

Why are there no 3, 4, 6, 7, 8 or 9 jiao notes?

Multiplication is related to addition. So what is related to subtraction?

Do children in other countries learn multiplication facts? How do they multiply?

Why do words look back to front in a mirror or in water?

北京师范大学出版社

Consolidate and Apply

1. Family skipping contest

	Round 1	Round 2	Round 3	Total
Dad	25 skips	28 skips	36 skips	
Mum	17 skips		25 skips	86 skips
Taoqi	24 skips	30 skips		78 skips

2. Aunt Wang has ¥100 and plans to buy 2 desk lamps.

Which lamps can Aunt Wang buy? How much is left? Give two ways.

3. Sunshine Mall had 46 TVs.

(1) Are there more or fewer TVs now than before?

(2) How many TVs are there now?

4.

(1) Buy 1 / and 1 pair of , how much is that? How will you pay?

(2) Aunt Li buys 1 and pays ¥50. How much change should she get?

5. Fill in.

(1) 1 is worth ___

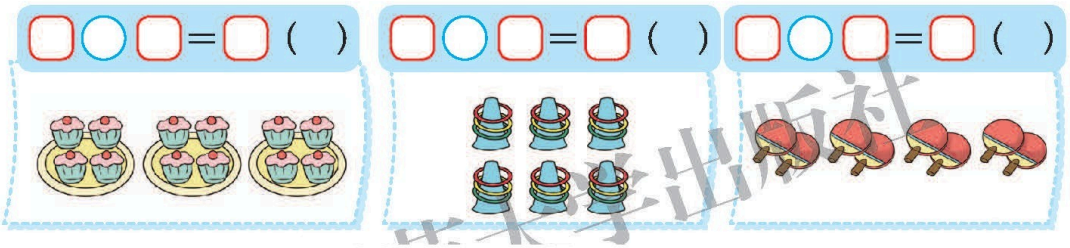
(2) ___ and ___ together make 1

6. Fill in.

$5+5+5+5=\square\times\square$ $\quad 3\times5=\square+\square+\square$

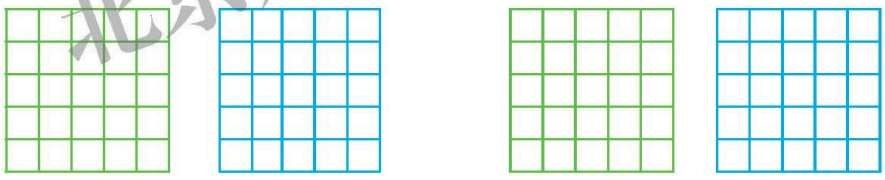
$8+8+8+8+8=\square\times\square$ $\quad 4+4+4=\square\times\square$

7. Write number sentences.

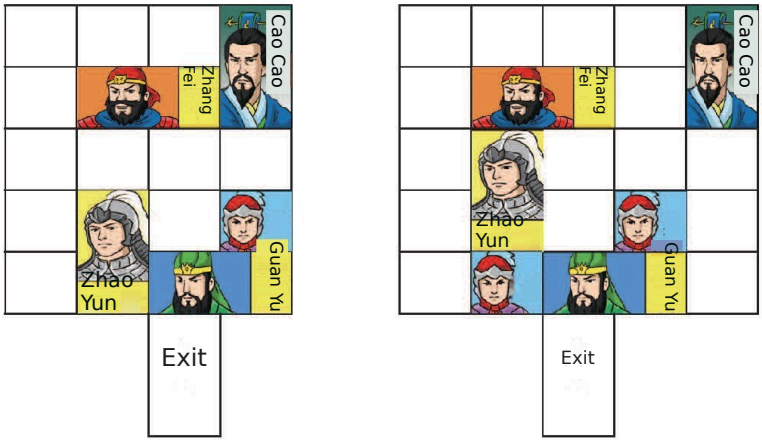


8. Colour in two ways to show each number sentence.

4×3 $\quad 5\times2$



9. A fun game of Klotski. Try it with Figure 2 on Appendix page 3.



北京师范大学出版社

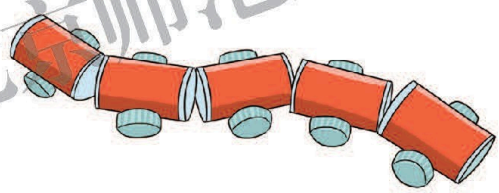
10. Complete each times-table fact, then write its multiplication sentences.

$3 \times 9 =$ ____	$2 \times 7 =$ ____	$4 \times 5 =$ ____
$\square \times \square = \square$ $\square \times \square = \square$	$\square \times \square = \square$ $\square \times \square = \square$	$\square \times \square = \square$ $\square \times \square = \square$

11. Deliver the mail.

$2 \times 4 =$	$6 \times 2 =$	$5+5+5=$	$4+4=$
$6+6=$	$5 \times 3 =$	$2+2+2+2+2+2=$	
$2 \times 6 =$	$4 \times 2 =$	$3 \times 5 =$	

12. A toy train needs 5 cans as carriages, and each carriage needs 2 bottle caps as wheels. How many bottle caps are needed to make one train like this?



13. How much does it cost to buy each kind of art supply below?

	¥2 each	¥3 each	¥4 each	¥5 per box
Quantity	8	7	9	6
Cost				

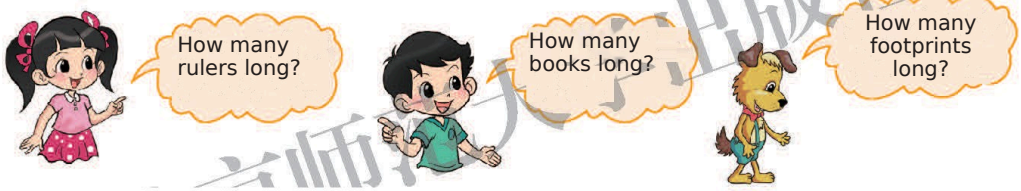
14. Fill in and share your method with your partner.

$3 \times \square = 12$	$\square \times 5 = 25$	$\square \times 3 = 24$	$4 \times \square = 32$
$20 = \square \times 4$	$2 \times 8 = \square \times 4$	$\square \times 2 = 3 \times 4$	$\square \times 6 = 24$

Unit 6 Measurement

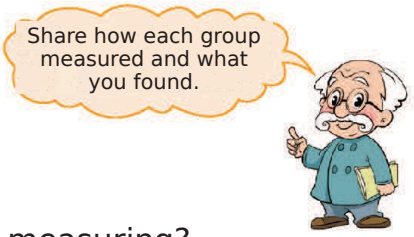
How Long Is the Classroom?

- How can we measure the length of the classroom?



- Work in groups: choose a measuring tool, measure, and fill in the table.

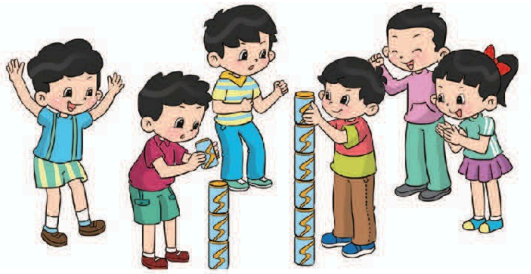
Our group's measuring tool	
Our group's result	

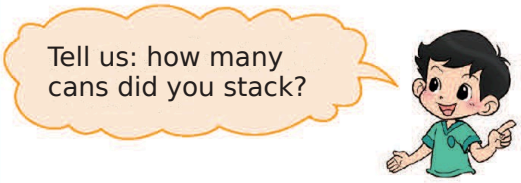


- What should we pay attention to when measuring?

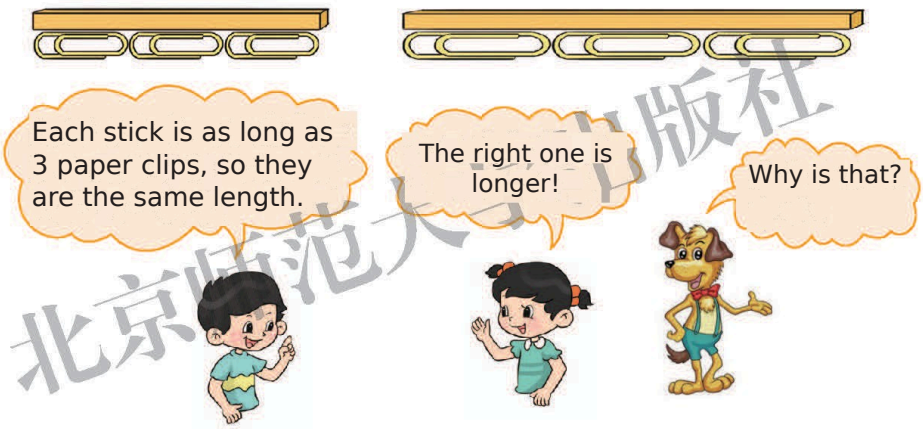
Practice

1. Stack cans and see whose tower is the tallest.





2. Talk about it.

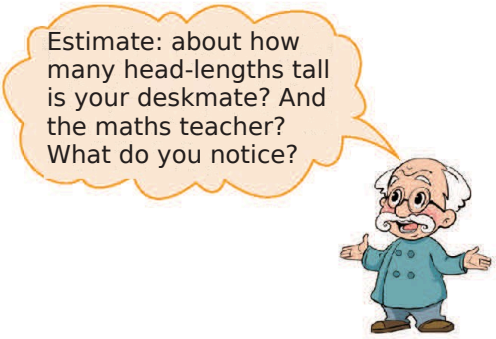


北京师范大学出版社

3.

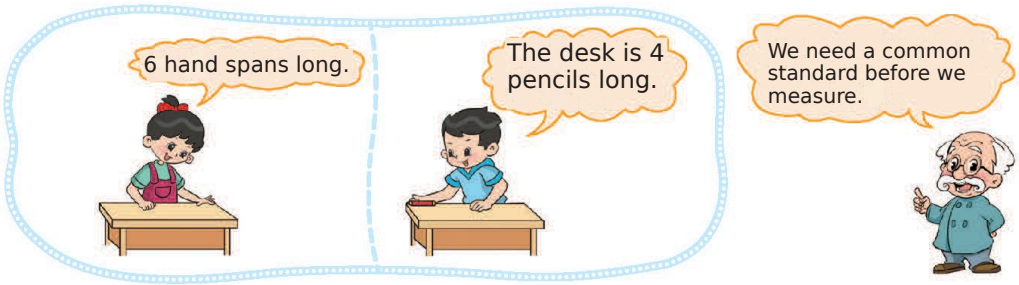
$28+33+39$	$34-25+16$	$47+25-38$
$87-27-24$	$55+32-66$	$32+48-36$

4. Estimate: how many head-lengths tall is each person below?

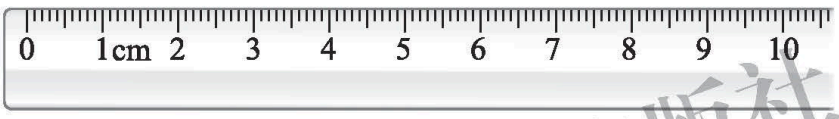


How Long Is the Desk?

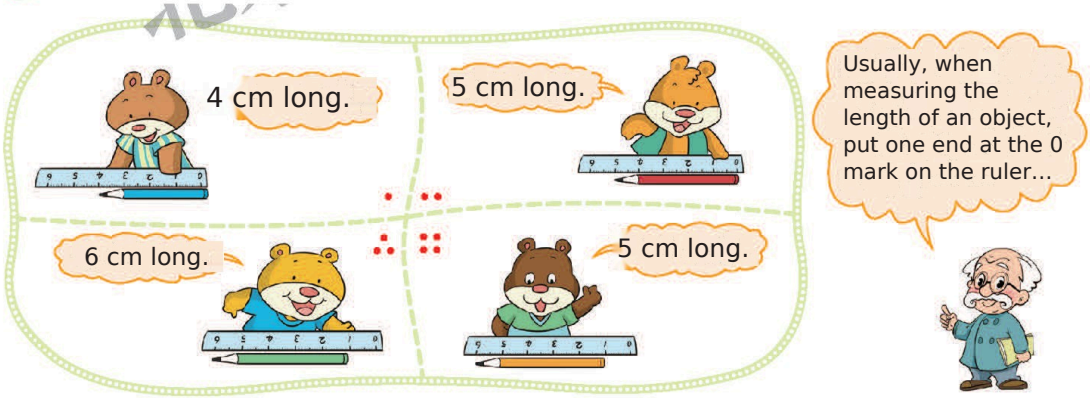
Think: the desks are the same, so why are the results different?



You can measure length with a ruler. Take a look.



Measure how long your pencil is. Think: are they measuring correctly?



Measure and draw.

Measure how long it is.	Draw a line 4 cm long.
_____	

华南师范大学出版社

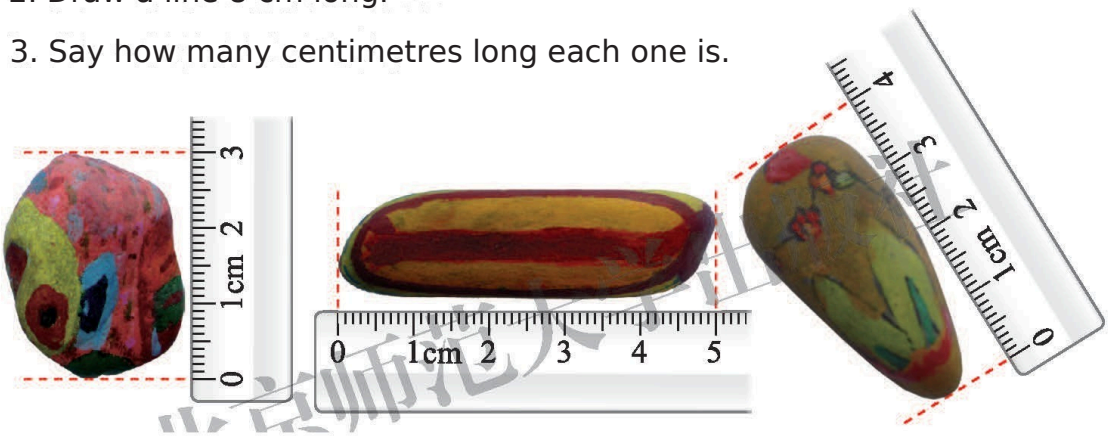
Practice

1. Estimate and measure.

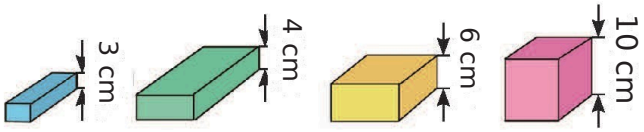
	Estimate	Measured
Pencil	( ) cm	( ) cm
Eraser	( ) cm	( ) cm
Pencil case	( ) cm	( ) cm

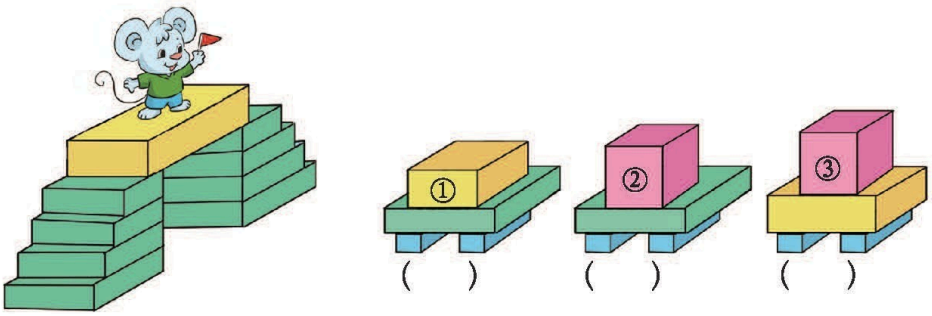
2. Draw a line 8 cm long.

3. Say how many centimetres long each one is.

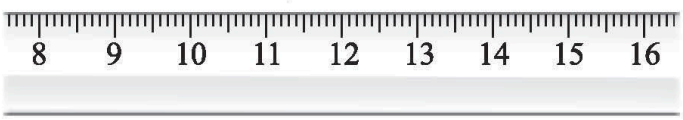


4. Which trucks can pass under the bridge? Mark them with "✓"

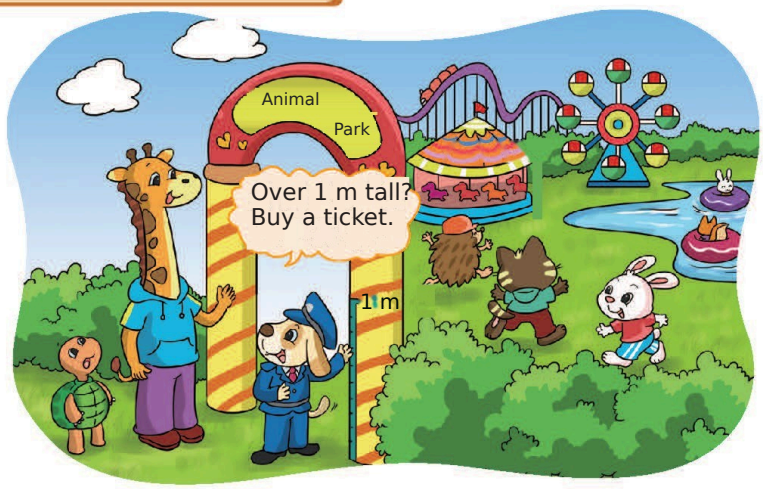




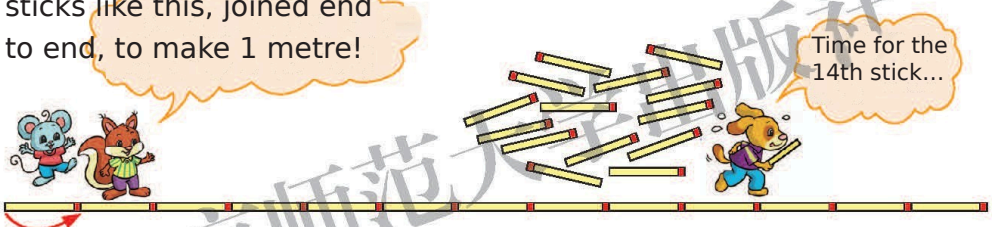
5. Think: how can you draw a 6 cm line with this broken ruler?



How Long Is 1 Metre?



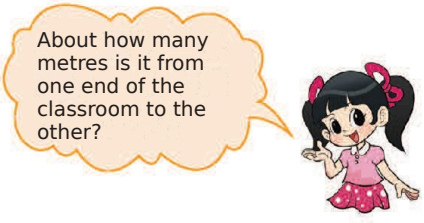
Look and think. It takes 100 sticks like this, joined end to end, to make 1 metre!



1 m = 100 cm. The metre can be written as m.

Compare and say.

Work in groups and measure with a ruler.



Think: should you fill in "centimetres" or "metres"?

Door: about 2 ____

Hand span: about 15 ____

Cucumber: about 20 ____

Eraser: about 3 ____

Mr Li: about 175 ____

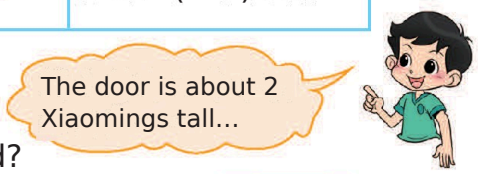
Tree: about 10 ____

Think: how long is 1 cm? And 1 m?

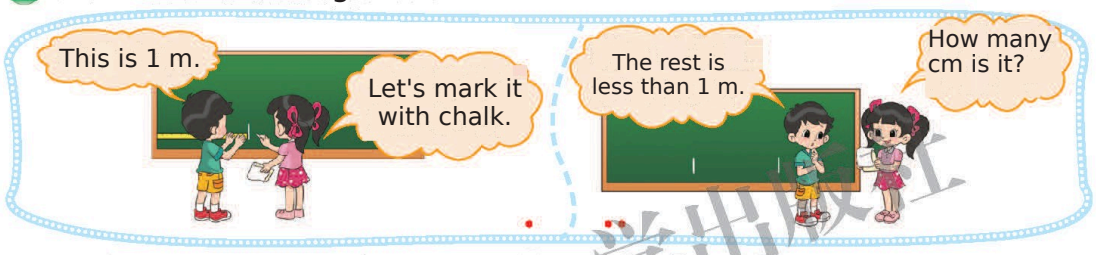
Try It

Estimate: how tall are Xiaoming and Clever Dog?

	About ( ) cm tall
	About ( ) cm tall



Measure: how long is the blackboard?



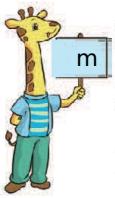
The blackboard is ___ m ___ cm long.

北京师范大学出版社

Practice

1. Find a 1 m ruler. Estimate: about how many pencils long is 1 m?
Look for things in everyday life that are about 1 m long.

2. Fill in.



(1) Pencil: about 17 ____。 (2) Eraser: about 3 ____。

(3) Flagpole: about 8 ____。 (4) House: about 3 ____。

(5) Towel: about 60 ____。 (6) Loofah: about 35 ____。

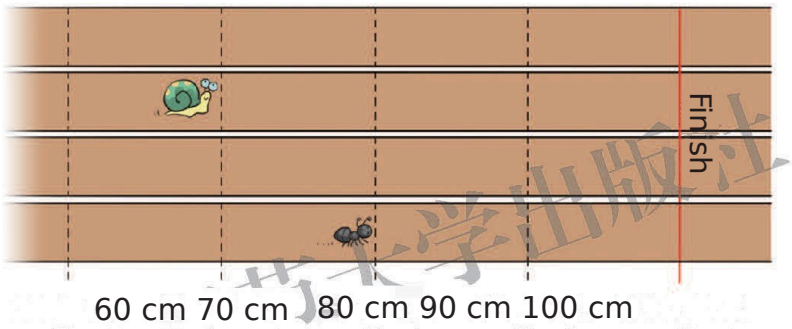
3. Whose guess is right?

4. Estimate and measure.

	Estimate	Measured
Classroom width	___ m	___ m ___ cm
Door height	___ m	___ m ___ cm
	___ m	___ m ___ cm

Talk about it: how can you estimate well? What should you watch for when measuring?

5.



(1) The total length is 100 cm, which is ___ m.

(2) has crawled 70 cm and has ___ cm left.

(3) Ask another maths question and try to answer it.

6. In groups of four, measure each other's arm length with a ruler and fill in the table.

Name				
Arm length/cm				

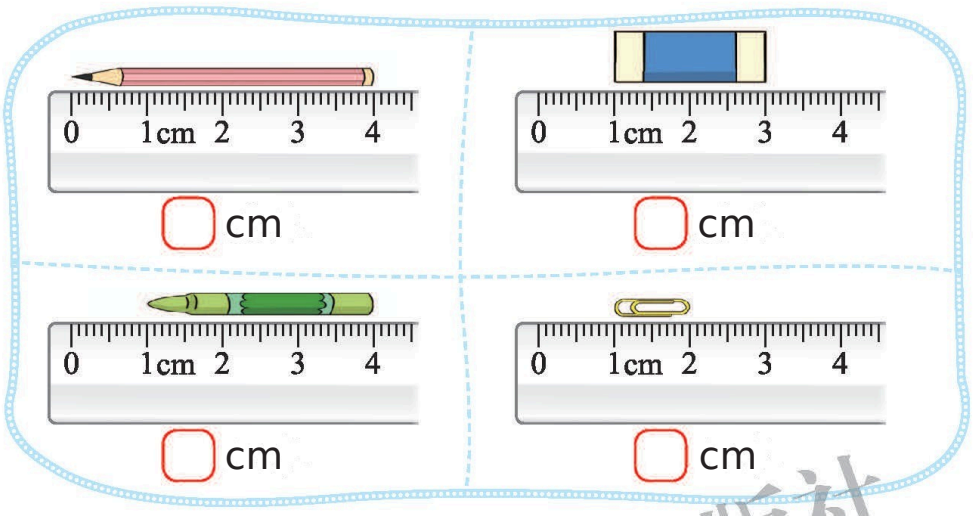
7. Do the standing long jump 4 times in a row and record the result of each jump.

	Jump 1	Jump 2	Jump 3	Jump 4
Distance/cm				

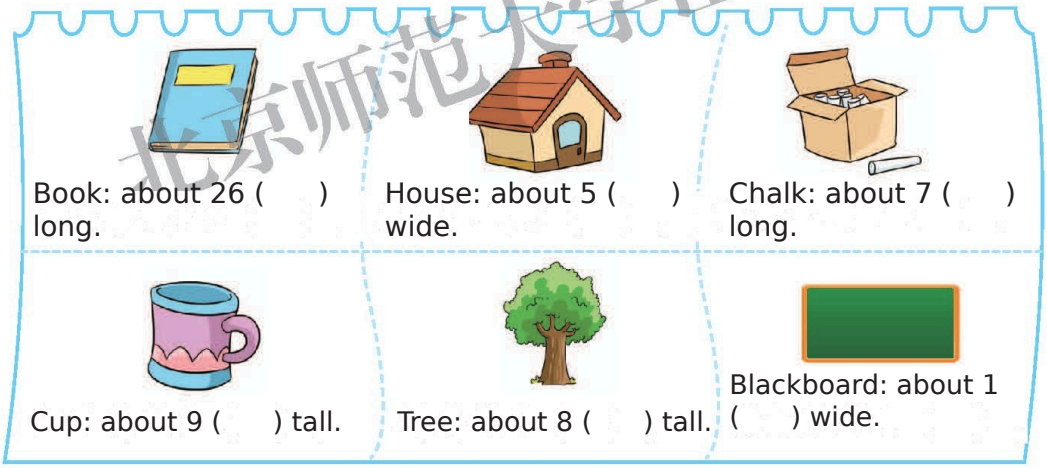
Compare: how far was your longest jump? How far was your shortest jump?

Exercise 4

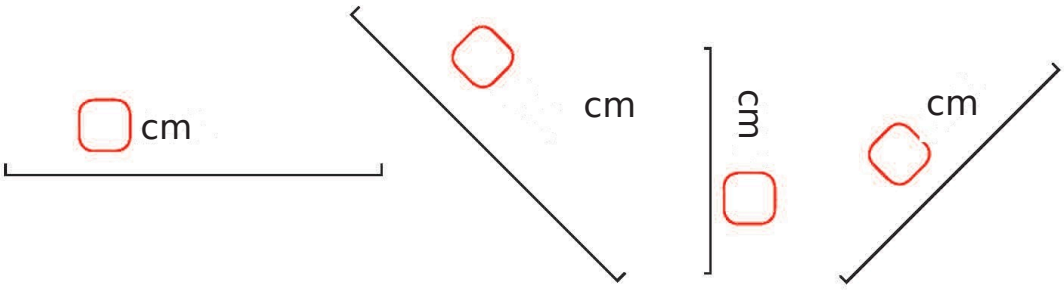
1. Fill in.



2. Fill in each bracket with the right unit (cm or m).



3. Measure and fill in.



北京师范大学出版社

4. Cut a piece of string 1 m long and compare it with the things below in your home.

(Put "✓" if longer than 1 m and "×" if shorter than 1 m)

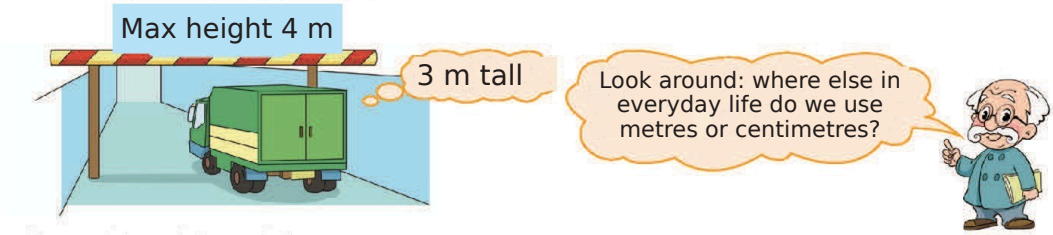
5. Do it and measure.

(1) Join 5 paper clips together and measure how long they are in total.

(2) 5 children hold hands. Measure how long they are in total.

(3) First estimate how far it is from your seat to the teacher's desk. Then measure it with your deskmate.

(4) Do you know what "Max height 4 m" means? Look around your school: how high is 4 m?



6. Read and do.

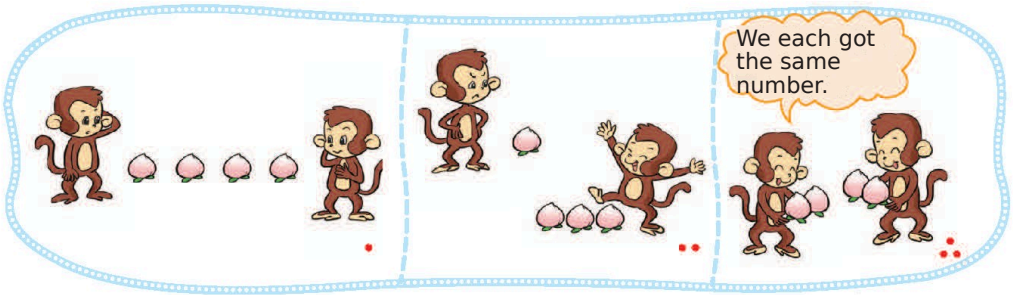
The metre and the centimetre are units of length used all over the world. China also has its own units of length, such as the chi and the cun. They are related like this: 1 metre = 3 chi, 1 chi = 10 cun.

Compare: how long is 1 chi? And 1 cun?

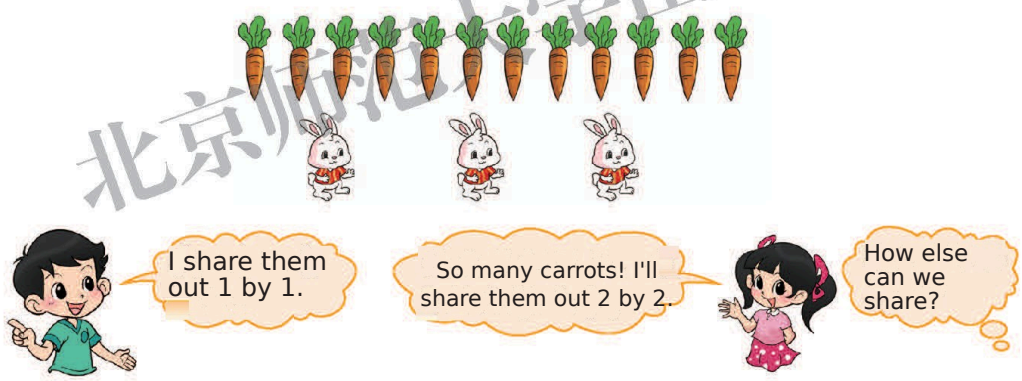
Unit 7 Sharing and Division

Sharing Game

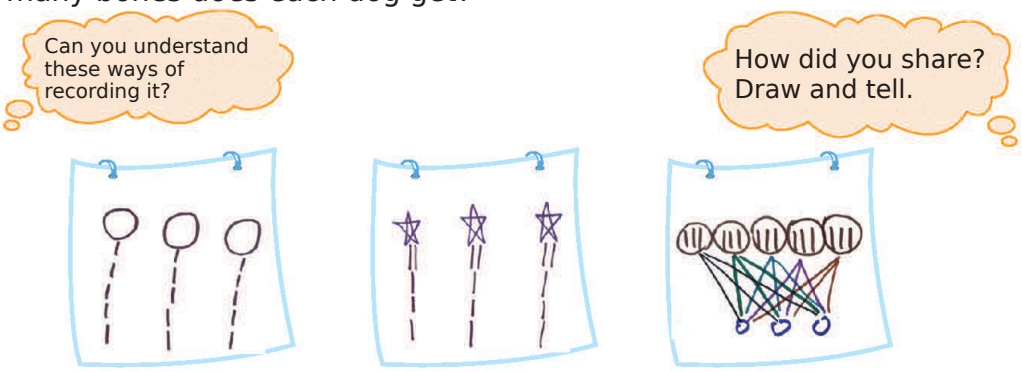
Share the peaches. How many peaches can each monkey get? Share them out and talk about it.



Share the carrots. Each rabbit gets the same number of carrots. How many carrots does each rabbit get?



Share the bones. 15 bones are shared equally among 3 dogs. How many bones does each dog get?

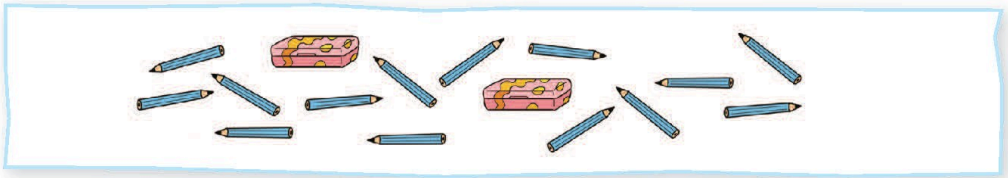


Practice

1.

Each vase has the same number: ☐ flowers.

2.

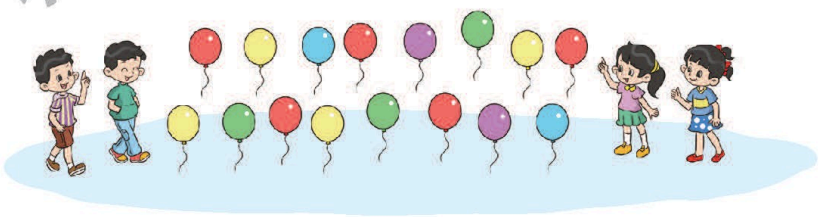


Shared equally, each pencil case holds ☐ pencils.

3.

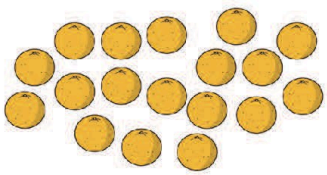
Each shelf has the same number: ☐ cups.

4.



Shared equally, each child gets ☐ balloons.

5. Use counters for oranges. Arrange and fill in.



2 equal groups: ____ in each

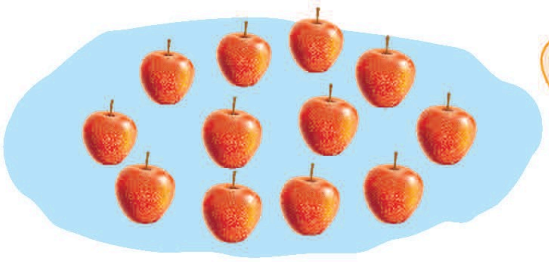
3 equal groups: ____ in each

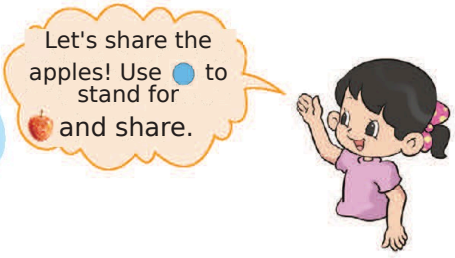
6 equal groups: ____ in each

9 equal groups: ____ in each

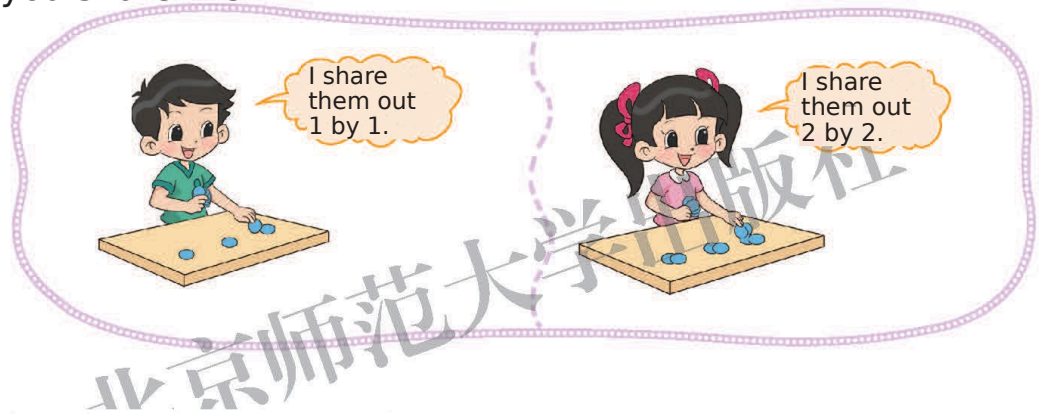
北京师范大学出版社

Sharing Apples



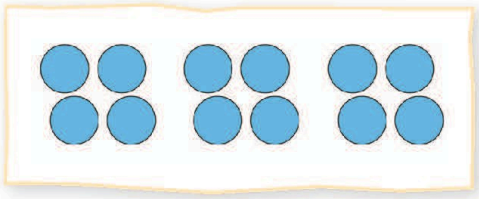


- Make 3 piles with the same number in each. How can you share them?

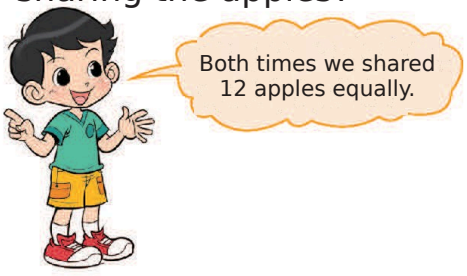


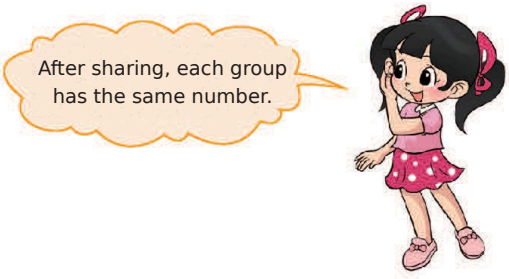
北京师范大学出版社

- Each bag holds 4 apples. How many bags are needed?



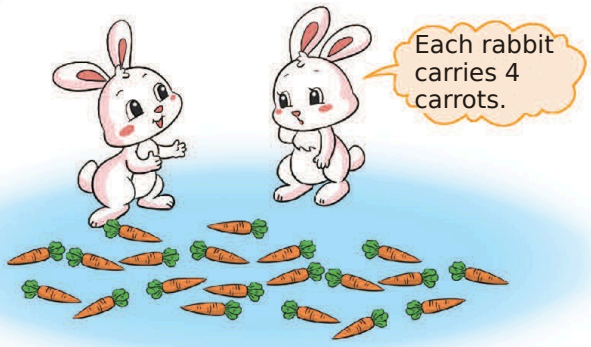
- Talk about it: what is the same about the two ways of sharing the apples?





Practice

1.



It takes ☐ rabbits to carry them all in one trip.

2. Circle and fill in.

(1) Each basket holds 2 .

You need ☐ baskets.

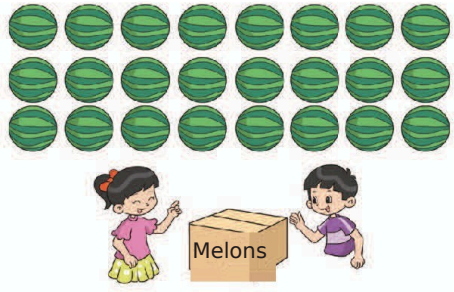
(2) Share equally among 6 baskets.

Each holds ☐

3. Circle and calculate.

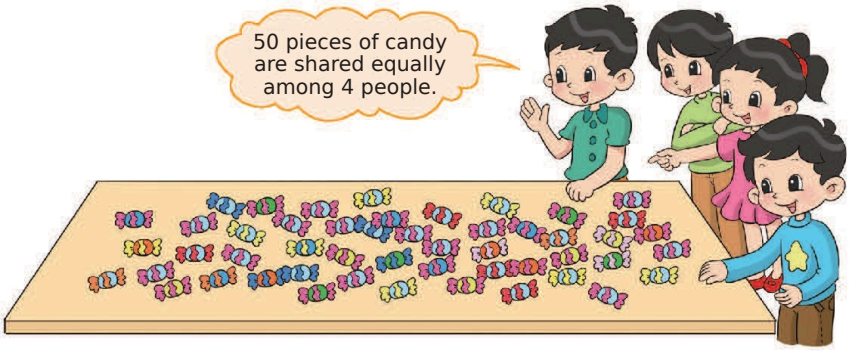
(1) How many watermelons in all?

(2) Each box has 4 watermelons. How many boxes are needed?



4. How else can these children line up?

Sharing Candy



Say how we can share them.

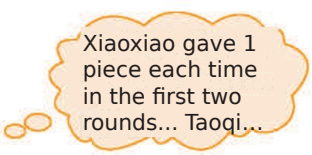
Below are Xiaoxiao's and Taoqi's records. Can you understand how they shared?

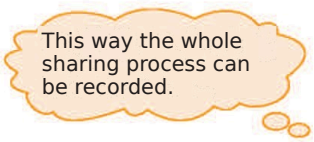
	Pupil 1	Pupil 2	Pupil 3	Pupil 4
Round 1	1	1	1	1
Round 2	1	1	1	1
Round 3	2	2	2	2
Round 4	2	2	2	2
Round 5	2	2	2	2
Round 6	2	2	2	2
Round 7	2	2	2	2

Left: 2 pieces.

	Pupil 1	Pupil 2	Pupil 3	Pupil 4
Round 1	5	5	5	5
Round 2	5	5	5	5
Round 3	2	2	2	2
Round				
Round				
Round				
Round				

Left: 2 pieces.





How did you share? Fill in Appendix 4.

Practice

1. Share and fill in.

Share 30 sticks equally among the children in your group.

(1) Say how you can share.

(2) Share them and record how you shared.

Name						
Round 1						
Round 2						
Round 3						
Round 4						

Each child gets ____ sticks, with ____ left.

The school bought 70 books to share equally among the 3 Grade 2 classes.

(1) Say how you can share.

(2) Share them and record how you shared.

Class			
Round 1			
Round 2			
Round 3			
Round 4			

Each class gets ____ books, with ____ left.

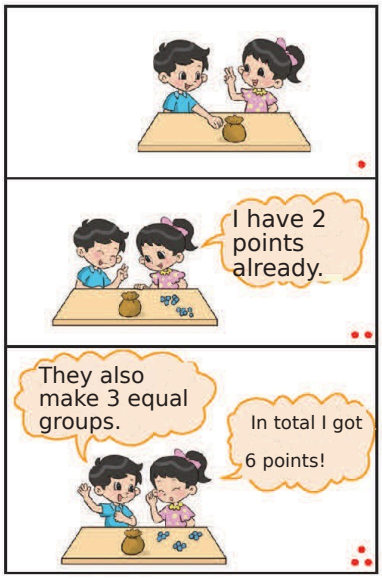
2. Play a game.

(1) Put some beans in a bag, and one child takes a handful of beans.

(2) If the beans in your hand can be shared equally into 2 groups, you score 2 points; if into 3 groups, 3 points; if into both 2 groups and 3 groups, 6 points; otherwise, no points.

(3) Each person plays 3 times.

(4) The one with the higher total score wins.



北京师范大学出版社

Sharing Bananas

Share 12 bananas equally. How can you share them?

2 equal shares, 6 bananas each.

4 in each share makes 3 shares.

Any other ways to share?

Problems like these can all be shown with division.

Learn the names and think.

$12 \div 2 = 6$ (bananas)

dividend

divisor

quotient

division sign

How do we write the other ways as division number sentences?

12÷2 is read as 12 divided by 2

Say what each number in the number sentence means.

I get it! 12 means 12 bananas, 2 means sharing equally among 2 monkeys, and 6 means each monkey gets 6 bananas.

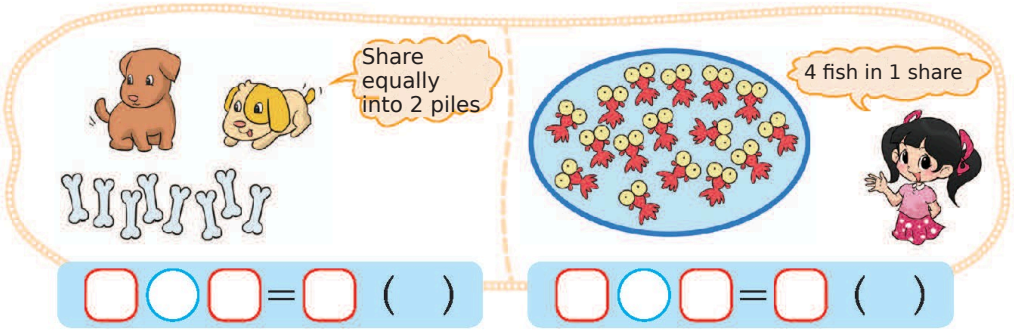
Write the problems on pages 60 and 61 as division number sentences.

Tell your partner what each number in the number sentence means.

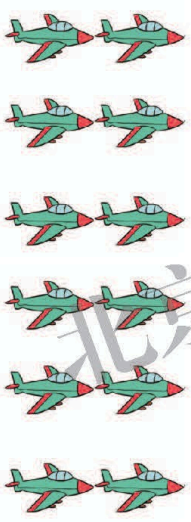
北京师范大学出版社

Practice

1. Circle, fill in, and say what each number in the number sentence means.



2.



(1) There are □ planes.

□○□=□ ( )

(2) With 3 planes in 1 group, you can make □ groups.

□÷□=□ ( )

(3) With 4 planes in 1 group, you can make □ groups.

□÷□=□ ( )

(4) In 6 equal groups, each has □ planes.

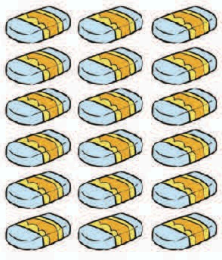
□÷□=□ ( )

3. (1) 6 erasers fill 1 box. How many boxes? □

□÷□=□ ( )

(2) Put them equally in 3 boxes. Each has □

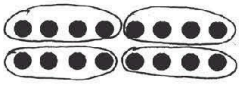
□÷□=□ ( )



4. Talk about it and draw it.

16 children, 4 in 1 group, make 4 groups

16÷4=4

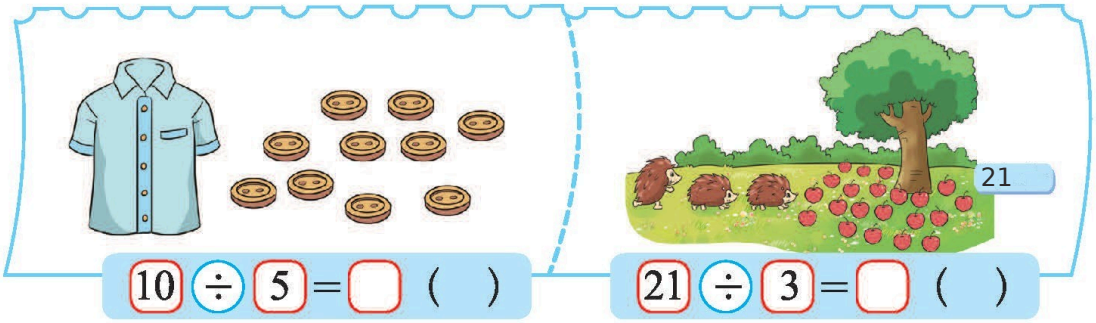


Try a few more number sentences.

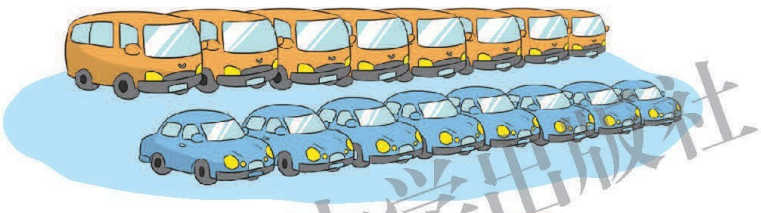
北京师范大学出版社

Exercise 5

1. Circle, fill in, and say what each number in the number sentence means.



2.



(1) With 2 cars in 1 group, you can make □ groups.

□ ÷ □ = □ ( )

(2) With 4 cars in 1 group, you can make □ groups.

□ ÷ □ = □ ( )

(3) With 8 cars in 1 group, you can make □ groups.

□ ÷ □ = □ ( )

3.

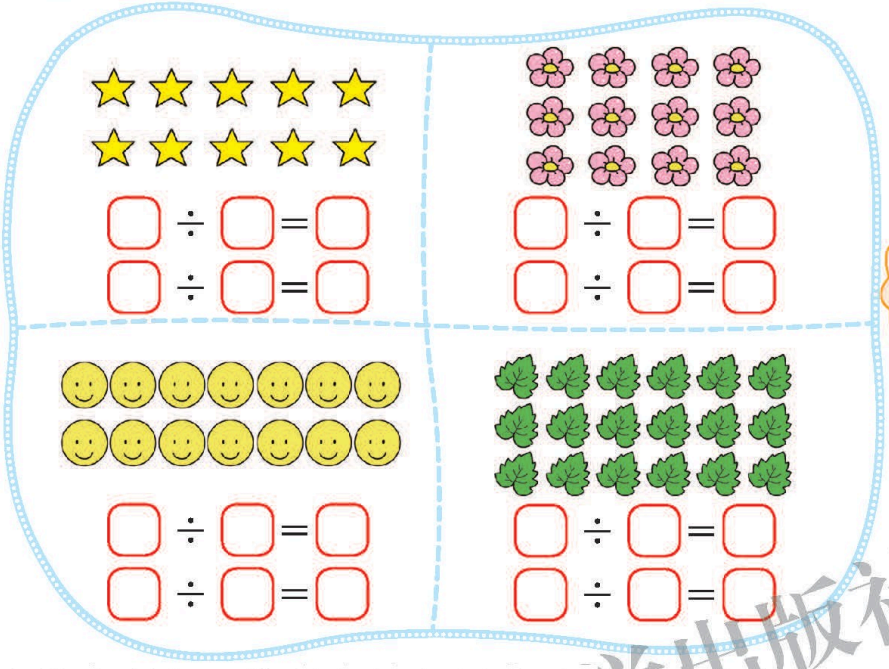
(1) Put them equally in 2 baskets. Each has □

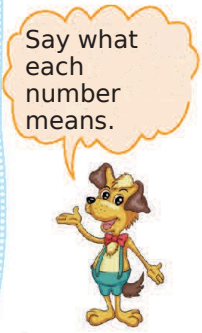
□ ÷ □ = □ ( )

(2) 9 in each basket. We need □ baskets.

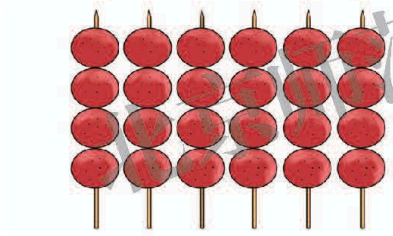
□ ÷ □ = □ ( )

4. Write two number sentences for each picture.





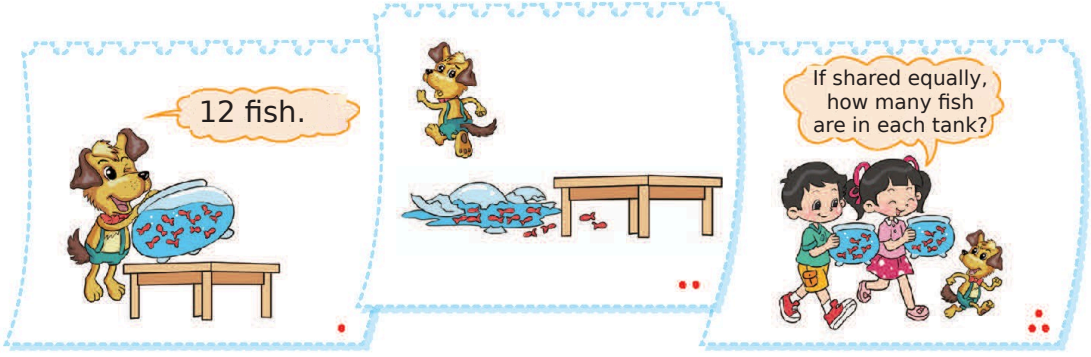
5. Use the picture to say what each number sentence means.



$6 \times 4 = \square$ $\quad 4 \times 6 = \square$

$24 \div 6 = \square$ $\quad 24 \div 4 = \square$

6. Tell a story, then write a number sentence and work it out.



7. With a partner, make up stories for these number sentences.

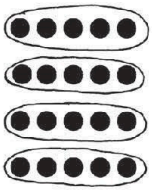
$20 \div 4 = 5$ $\quad 10 \div 2 = 5$

华东师范大学出版社

Little Bear's Shop

With ¥20, how many ?

□ ○ □ = □ ( )

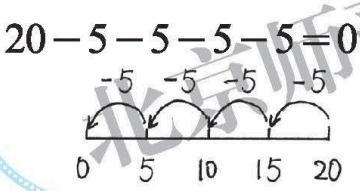


1 car: ¥5

2 cars: ¥10

3 cars: ¥15

4 cars: ¥20



4 × 5 = 20, so we can buy...

Multiplication facts make it easy!

Answer: ¥20 buys ____ cars 。

With ¥36, how many ? Work it out and explain.

□ ○ □ = □ ( )

Which fact do I use?

Answer: ¥36 buys ____ dolls 。

Pose another division problem and try to solve it.

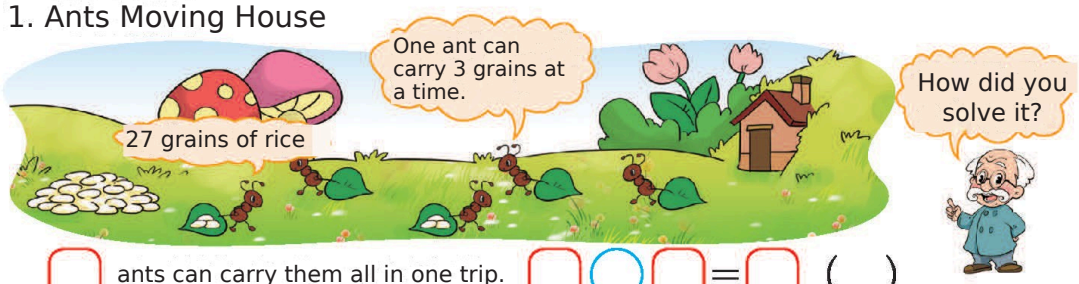
I have ¥40. How many ?

I have ¥21. How many can I buy?

北京师范大学出版社

Practice

1. Ants Moving House



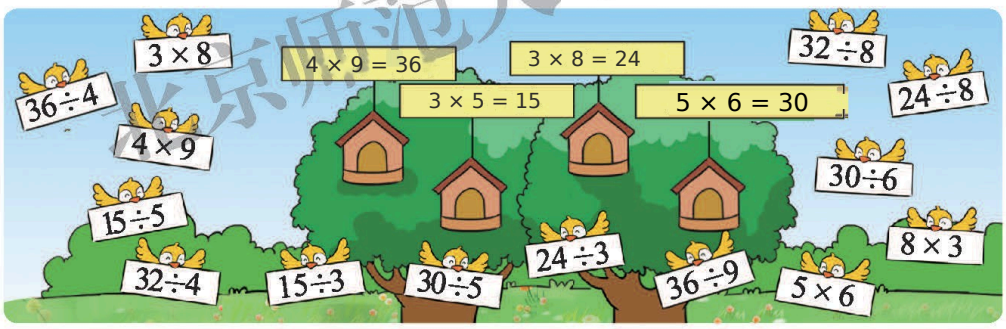
□ ants can carry them all in one trip. □ ○ □ = □ ( )

2. Planting Trees

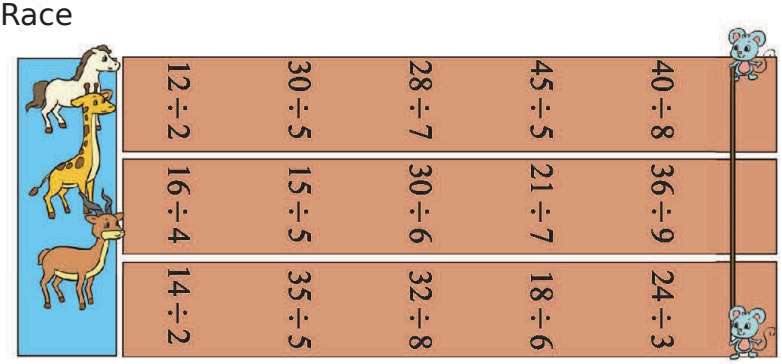
(1) How many rows can be planted?

(2) If they are shared equally among 3 groups, how many does each group plant?

3. Birds Going Home



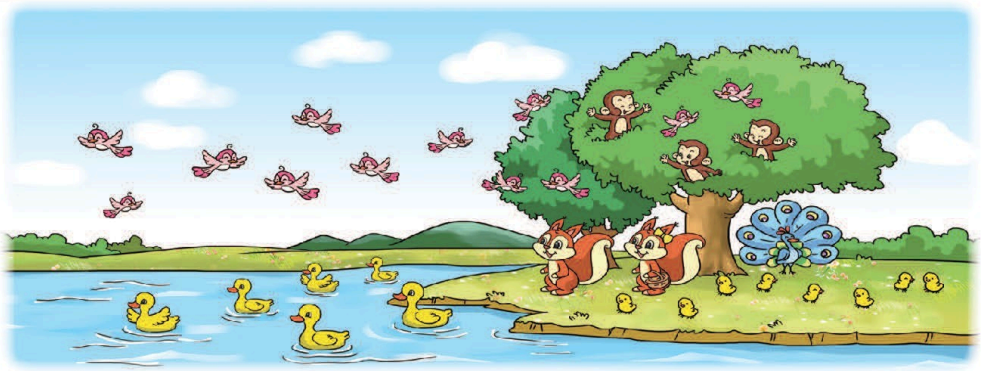
4. Animal Race



5. Think of daily life. Ask a question you can solve by division, and try to solve it.

北京师范大学出版

Happy Animals

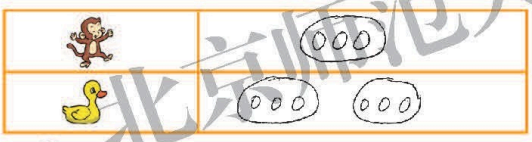


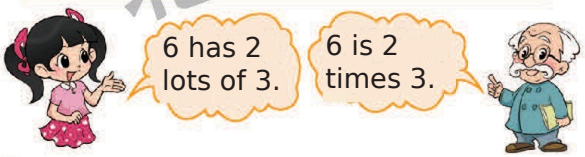
Count and fill in.

: ☐ , : ☐ , : ☐ ,

: ☐ , : ☐ , : ☐ .

Draw, circle and learn

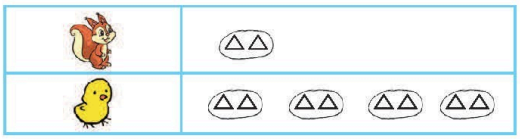




6 ÷ 3 = 2

= × 2 .

Draw, circle and fill in



8 ÷ 2 = 4

= × 4 .

☐ ○ ☐ = ☐

= × ☐ .

☐ ○ ☐ = ☐

= × ☐ .

北京师范大学出版社

Try It

The calf spent how many times as much as the rabbit?

	¥2
	¥2 ¥2 ¥2

□ ○ □ = □

Answer: The calf spent _____ times as much.

How much did the fox spend?

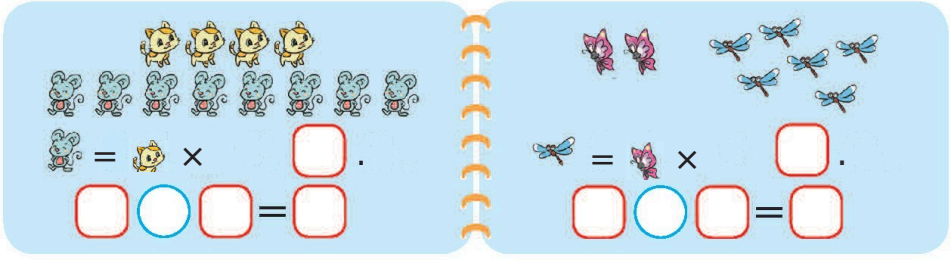
	¥2
	¥2 ¥2 ¥2 ¥2

□ ○ □ = □ ( )

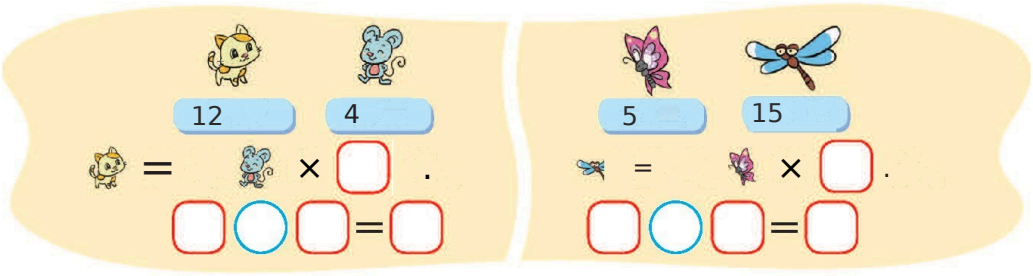
Answer: The fox spent ¥ _____ .

Practice

1. Circle and fill in.

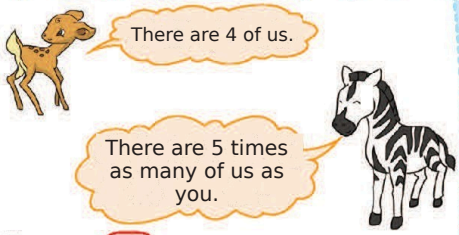


2. Draw and fill in.



北京师范大学出版社

3. Draw and fill in.



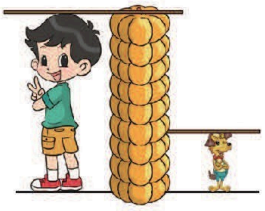
Zebras: ☐

☐ ○ ☐ = ☐ ( )

● = ○ × ☐.

☐ ○ ☐ = ☐

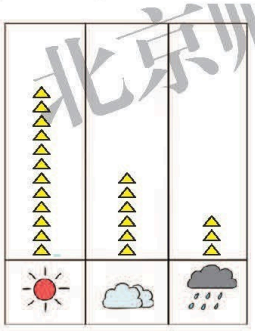
4.



's height = × ☐.

☐ ○ ☐ = ☐

5. The weather group recorded the recent weather in the table below.

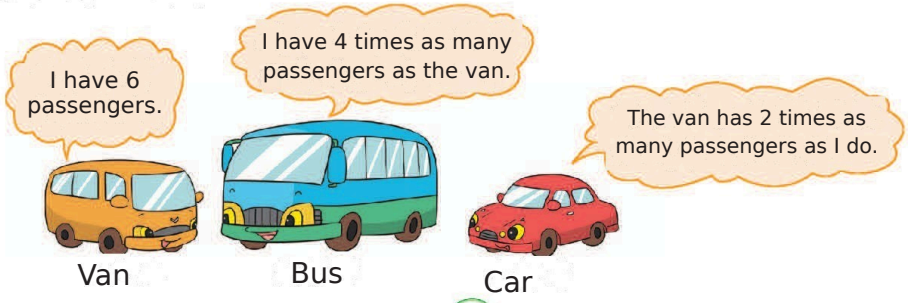


(1) days = × ☐.

☐ ○ ☐ = ☐

(2) Ask another maths question and try to answer it.

6. Draw and calculate.



(1) The bus has ☐ passengers. (2) The car has ☐ passengers.

北京师范大学出版社

Garden

Draw and calculate: how many times as many dragonflies as butterflies?

	✓ ✓ ✓ ✓
	XXXX XXXX XXXX

	△ △ △ △
	OOOO OOOO OOOO

□ ○ □ = □

Answer: There are ___ times as many dragonflies as butterflies.

How many bees? Draw and calculate.

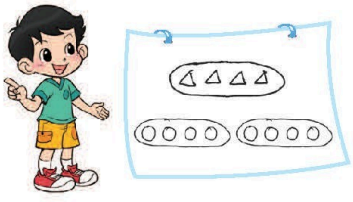
	9
	9 9 9

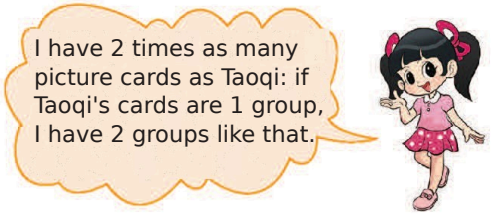
	9
	9 9 9

□ ○ □ = □ ( )

Answer: ___ bees.

What does "2 times" mean? Draw and give an example.





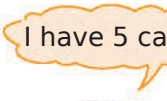
华东师范大学出版社

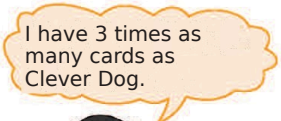
Practice

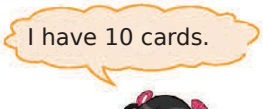
1. = × 2. Draw the .

There are ▢ . ▢ ◯ ▢ = ▢ ( )

2. Draw and calculate.



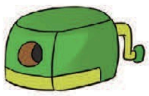




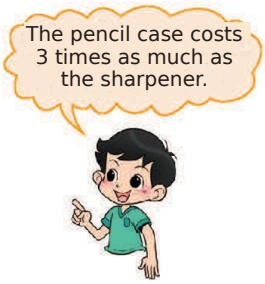
(1) How many cards does Taoqi have?

(2) How many times as many cards as Clever Dog does Xiaoxiao have?

3. Say it like Taoqi does.



¥12 ¥3 ¥6 ¥2



4. Estimate, measure and calculate.

Red ▢ cm

Yellow ▢ cm

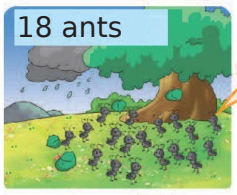
(1) Estimate: how many times as long as the yellow rope is the red rope? Share your method with a partner.

(2) Measure each rope and calculate. Was your estimate accurate?

北京师范大学出版社

Exercise 6

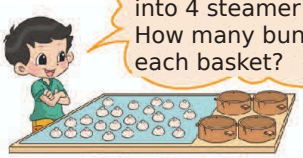
1. Circle, fill in, and say what each number in the number sentence means.



Every 3 ants carry one leaf home. How many leaves are needed?

Number sentence: ☐ ○ ☐ = ☐ ( )

Fact: _____

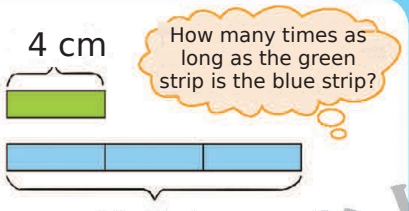


24 buns are put equally into 4 steamer baskets. How many buns are in each basket?

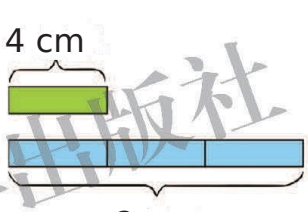
Number sentence: ☐ ○ ☐ = ☐ ( )

Fact: _____

2.



☐ ○ ☐ = ☐

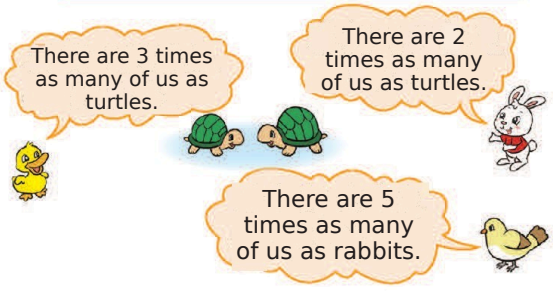


☐ ○ ☐ = ☐ ( )

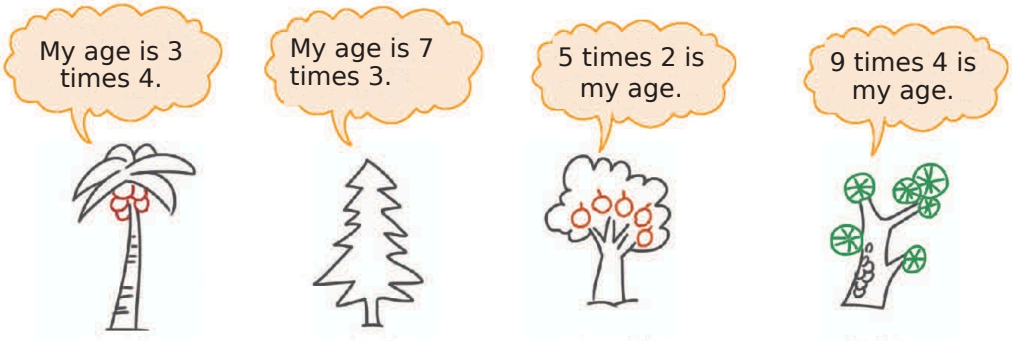
北京师范大学出版社

3. Fill in.

Number				



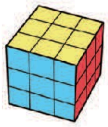
4. Guess how old I am.



5. Say it like Xiaoxiao does.

¥10

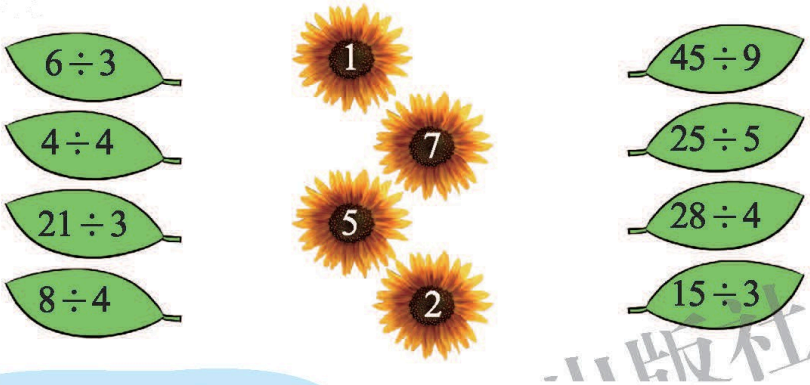
¥25



¥5

¥2

6. Match.



7.

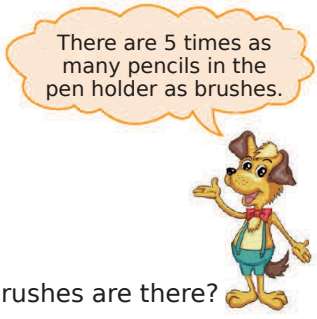
(1) How much do 6 pairs of gloves cost?

(2) The shoes cost how many times as much as the socks?

(3) What can you buy for exactly ¥30? Give two ways.

(4) Ask another maths question and try to answer it.

8.



(1) How many times as many coloured pens as brushes are there?

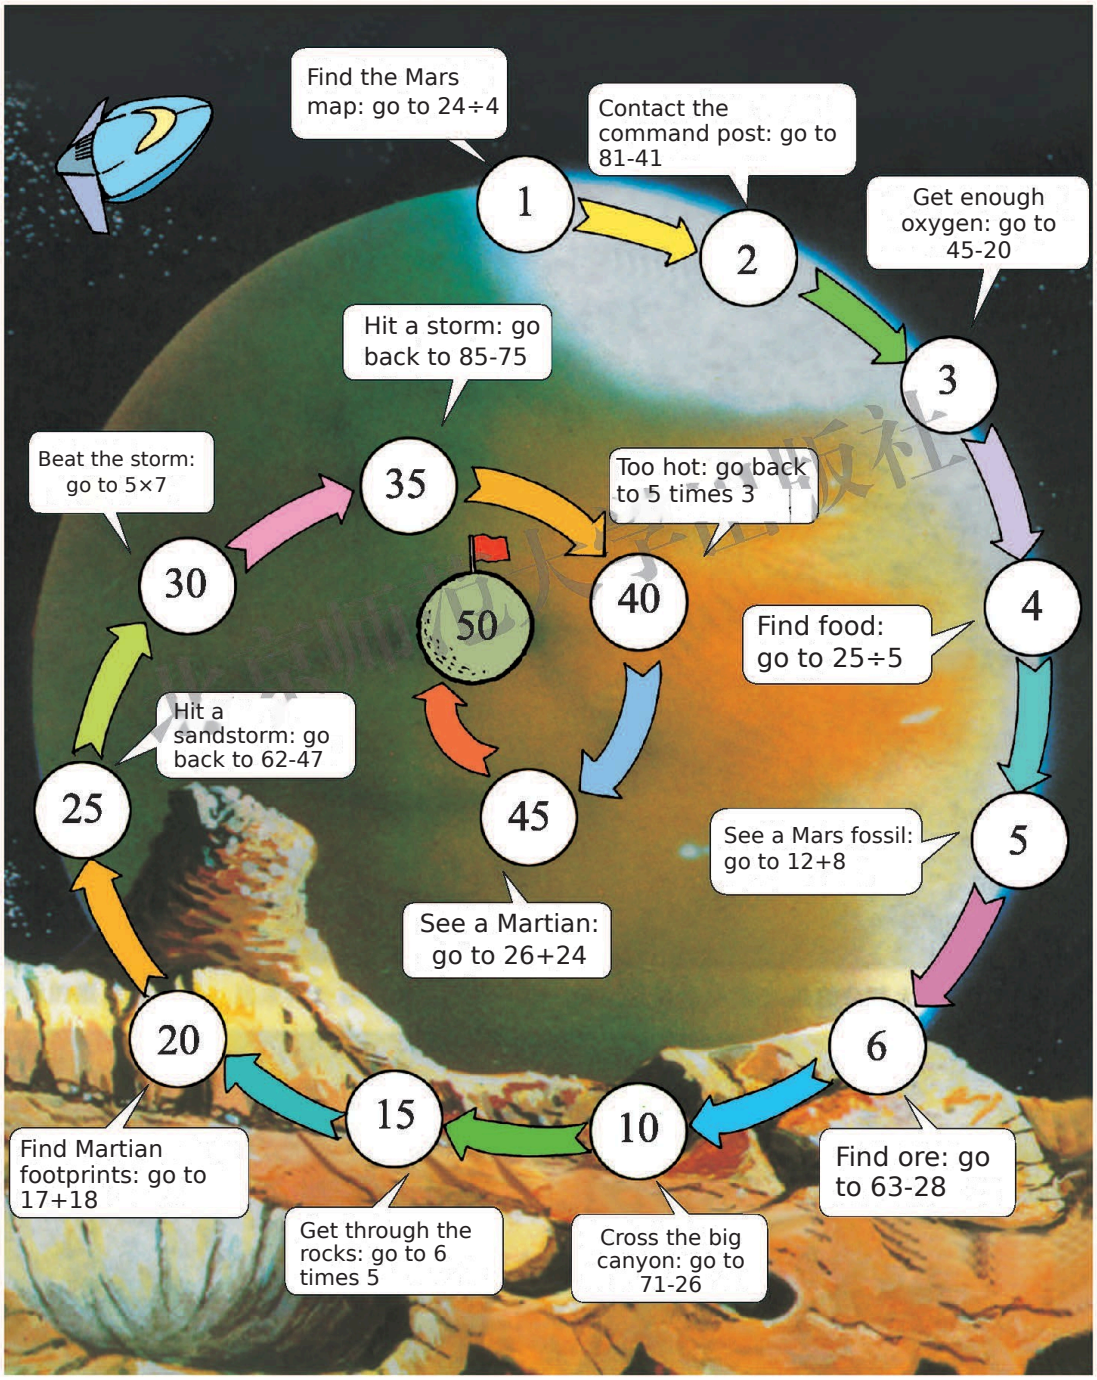
(2) How many pencils are there in the pen holder?

(3) How many brushes, coloured pens and pencils are there in total?

9. Find real-life problems about "times".

北京师范大学出版社

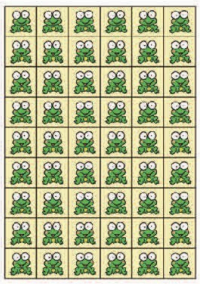
10. Roll a die once and put your counter on the number that comes up. Then move it as the board says. Play with a partner and see who takes fewer moves.



Unit 8 Multiplication Facts for 6 to 9

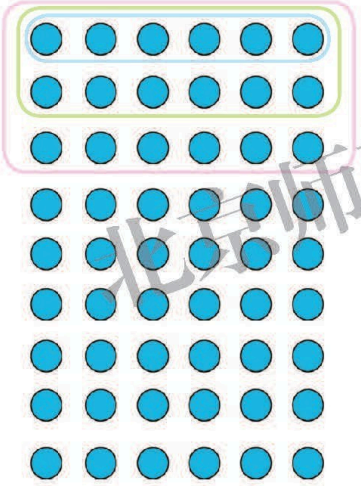
How Many Stickers?

Count and fill in.



Rows	1	2	3	4	5	6	7	8	9
Stickers	6	12	18						

Can you make up the multiplication facts for 6?



$1 \times 6 =$ ____ 1 six is ____

$2 \times 6 =$ ____ 2 sixes ____

$3 \times 6 =$ ____ 3 sixes ____

$4 \times 6 =$ ____ 4 sixes ____

$5 \times 6 =$ ____ 5 sixes ____

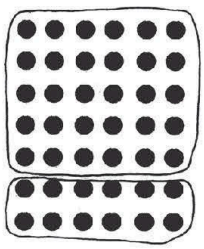
$6 \times 6 =$ ____ 6 sixes ____

$6 \times 7 =$ ____ 7 sixes ____

$6 \times 8 =$ ____ 8 sixes ____

$6 \times 9 =$ ____ 9 sixes ____

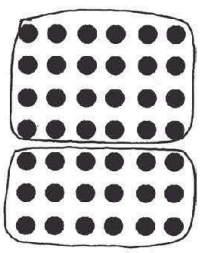
Use the two methods below to work out 6×7. Can you follow them? Talk about it, then fill in.



6×5

6×2

$6 \times 7 = 6 \times \square + 6 \times \square$



6×4

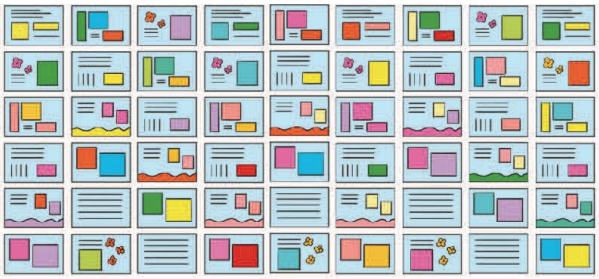
6×3

$6 \times 7 = 6 \times \square + 6 \times \square$

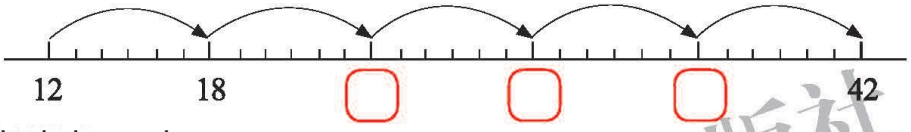
北京师范大学出版社

Practice

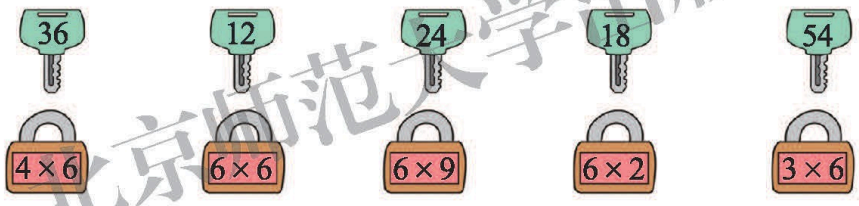
1. Calculate. How many posters are on the wall?



2. Fill in.

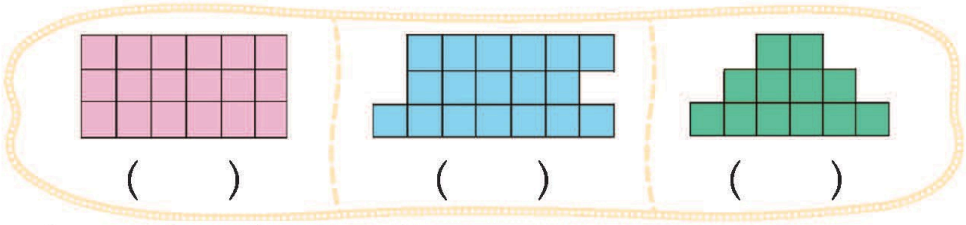


3. Find the pairs.

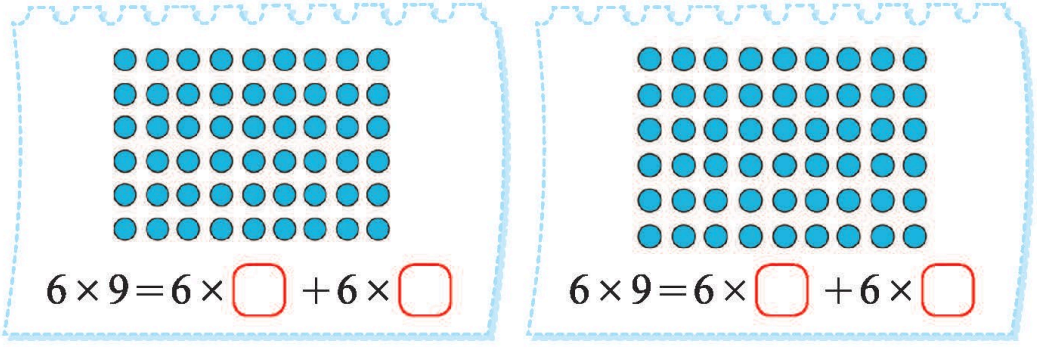


北京师范大学出版社

4. Calculate. How many squares are in each picture?



5. 6×9=? Circle and fill in.

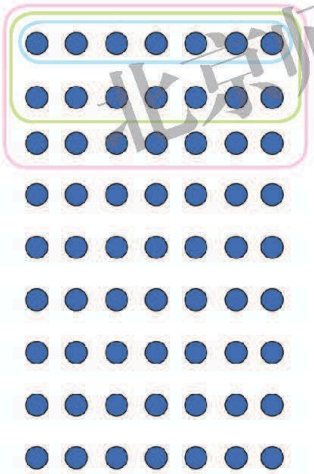


How Many Days?

Talk about it and fill in.

Weeks	1	2	3	4	5	6	7	8	9
Days in all	7	14	21						

Can you make up the facts for 7?



$1 \times 7 =$ ____ 1 seven is ____

$2 \times 7 =$ ____ 2 sevens ____

$3 \times 7 =$ ____ 3 sevens ____

$4 \times 7 =$ ____ 4 sevens ____

$5 \times 7 =$ ____ 5 sevens ____

$6 \times 7 =$ ____ 6 sevens ____

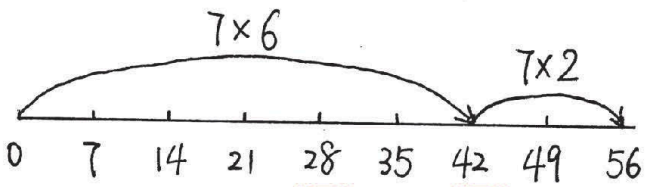
$7 \times 7 =$ ____ 7 sevens ____

$7 \times 8 =$ ____ 8 sevens ____

$7 \times 9 =$ ____ 9 sevens ____

Think: how are the facts related?

7×8=? This is Taoqi's way. Can you follow it? Talk about it, then fill in.

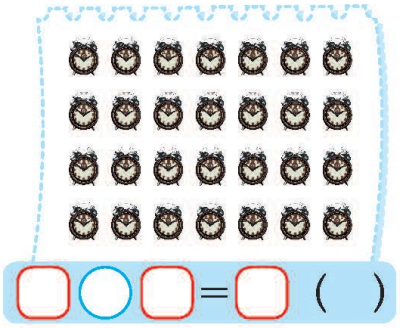


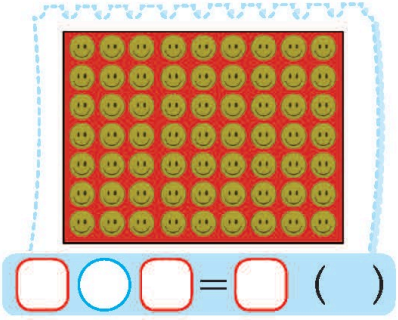
$7 \times 8 = 7 \times \square + 7 \times \square$

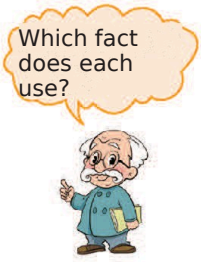
北京师范大学出版社

Practice

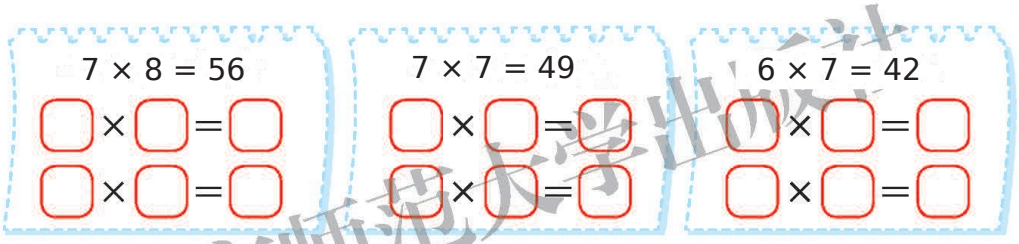
1. Write number sentences for the pictures and calculate.







2. Write number sentences for each fact.



北京师范大学出版社

3.

$7\times9=$	$4\times8=$	$8\times7=$	$2\times7=$
$2\times5=$	$7\times1=$	$6+7=$	$7\times5=$
$7\times6=$	$3\times7=$	$9\times2=$	$4\times9=$

4. Read and tell.

Sun Wukong spent 7 × 7 = 49 days in the furnace and came out with fiery golden eyes...

On the journey he met a monster. Without stopping to count 3 × 7 = 21, he raised his golden cudgel and struck...

5. Draw and fill in.

$7\times7=7\times\square+7\times\square$

Buying Balls

¥8

¥9

Talk about it and fill in.

Number of balls	1	2	3	4	5	6	7	8	9
Cost of footballs (¥)	8								
Cost of basketballs (¥)	9								

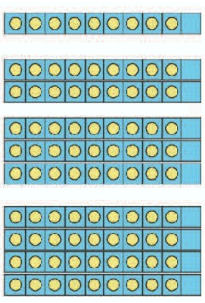
Can you make up the facts for 8 and 9?

1 eight is ____
2 eights ____
3 eights ____
4 eights ____
5 eights ____
6 eights ____
7 eights ____
8 eights ____
9 eights ____

1 nine is ____
2 nines ____
3 nines ____
4 nines ____
5 nines ____
6 nines ____
7 nines ____
8 nines ____
9 nines ____

京师范学出版社

Look and say.

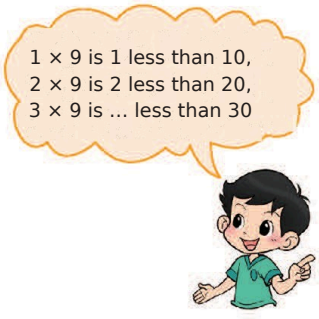


$9 \times 1 = 10 - 1$

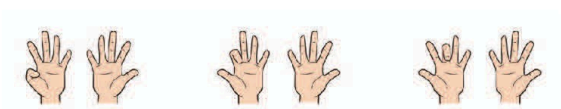
$9 \times 2 = 20 - 2$

$9 \times 3 = 30 - \square$

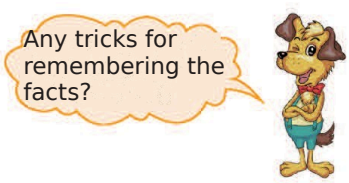
$9 \times 4 = \square - \square$



Use your 10 fingers for the facts for 9 too. Can you carry on?

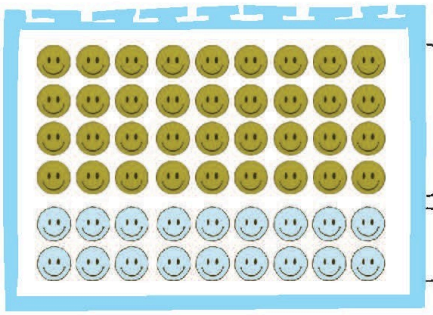


1 × 9 = 9　　2 × 9 = 18　　3 × 9 = 27



Practice

1.



□ × □ = □ ( )

□ × □ = □ ( )

Which fact does each use?

2.

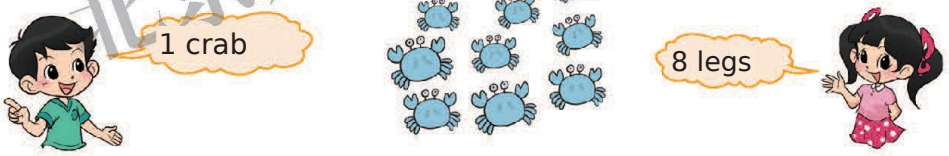
(1) How much do 9 balls cost?

(2) How much do 9 tennis balls cost?

(3) Is ¥30 enough for 4 tennis balls?

(4) Ask another maths question and try to answer it.

3. Ask and answer.



4.

8×4=	4×6=	8×2=	8×8=
7×9=	6×9=	4×9=	8×5=
9×8=	7×8=	9×9=	2×8=
3×9=	2×9=	8×7=	6+8=

5. Think and calculate.

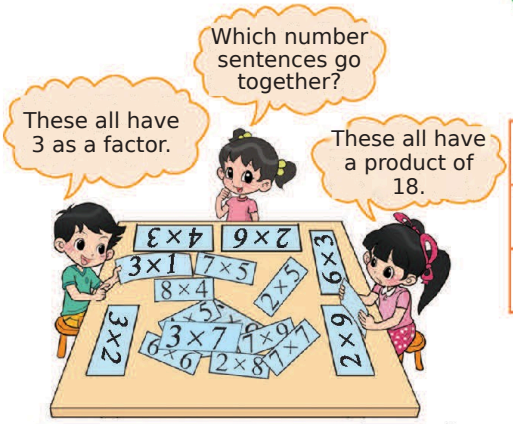
9×5+5	9×3−9	8×6−8
9×5+9	9×3−3	8×6−6

You can draw it.

北京师范大学

Make a Times Table

Find the number sentences with 3 as a factor and complete the table.



Factor	1	2							
Factor	3	3							
Product									

Find the number sentences whose product is 18, and fill in.

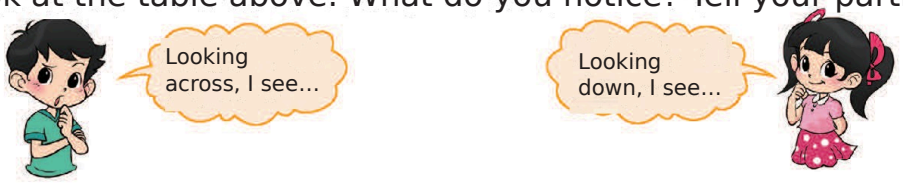
□ × □ = 18　　□ × □ = 18

□ × □ = 18　　□ × □ = 18

Taoqi made this multiplication table. Can you help him complete it?

×	1	2	3	4	5	6	7	8	9
1	1×1=1							8×1=	
2		2×2=4					7×2=		
3						6×3=			
4		2×4=							9×4=
5			3×5=		5×5=				
6				4×6=					
7		2×7=					7×7=		9×7=
8				4×8=	5×8=				
9			3×9=			6×9=		8×9=	

Look at the table above. What do you notice? Tell your partner.



北京师范大学出版社

Practice

1. Complete the multiplication facts.

3 × 7 = ____ 5 × 9 = ____ 7 × 9 = ____ 7 × 8 = ____

4 × 6 = ____ 6 × 6 = ____ 5 × 7 = ____ 8 × 8 = ____

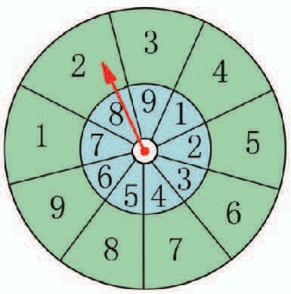
2. Choose some suitable numbers from "18, 27, 3, 9, 6" to make two multiplication number sentences and two division number sentences.

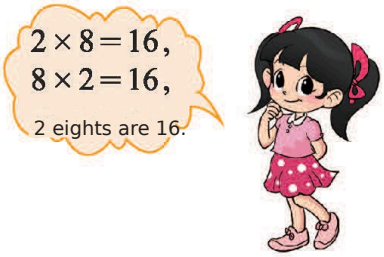
□ × □ = □ □ × □ = □

□ ÷ □ = □ □ ÷ □ = □

3. Are there enough seats?

4. Make a spinner, spin it, and calculate.





5. Think and calculate.

2 + 4 + 8 = □ × 2 3 + 6 + 9 = □ × 3

北京师范大学出版社

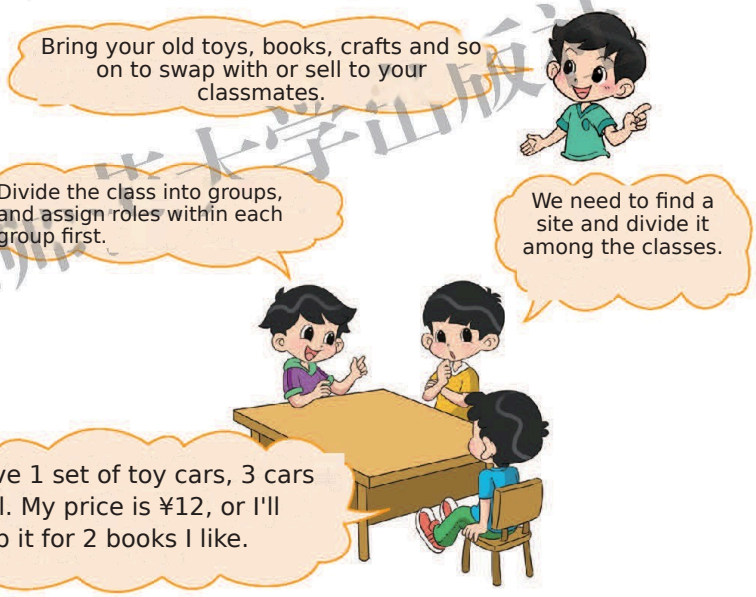
Maths Is Fun

Class Flea Market

Task

Design and organise a Grade 2 second-hand exchange activity.

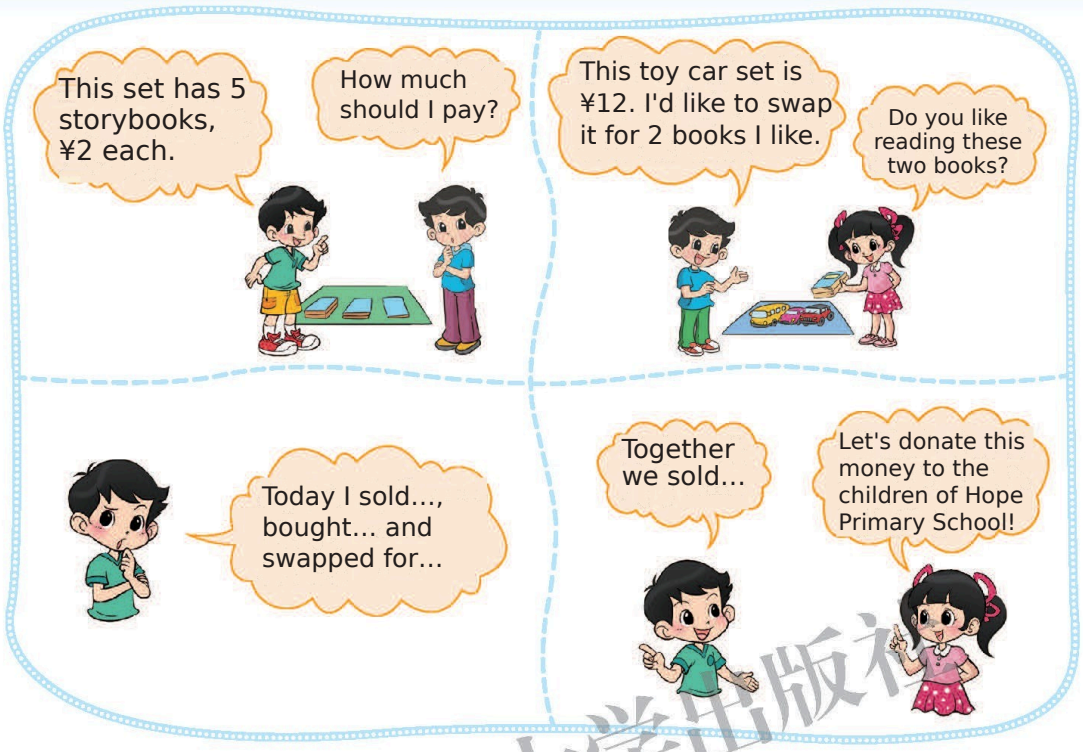
Discuss



Do It

Let the swapping begin!

北京师范大学出版社



Think

1. In the activity above, what maths knowledge did you use? What did you learn and how did you feel?

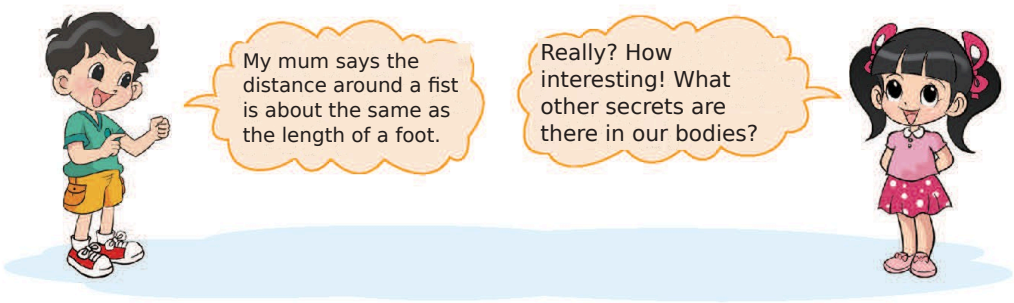
2. If we held an activity like this again, what do you think could be improved?

Self-Check

How I did in this activity:

Thought about problems carefully.			
Talked and worked with classmates.			
Used what I learned to solve problems correctly.			

Maths "Secrets" of the Body



Is it really true? Let's measure.

Measure each other, then fill in.

	Pupil 1	Pupil 2	Pupil 3	Pupil 4
Head length				
Hand span				
Step length				
Around the neck				
Around the waist				
Arm span				
Height				

What interesting "secrets" have you discovered through measuring?

I found that my arm span is about the same as my height.

I found...

Read and tell.

My Body Is a Ruler

Each of my steps is about 50 cm. On the way to school, I count my steps and can estimate how far it is from home to school. I am 130 cm tall. If I hug a big tree and my hands just meet, I know the distance around the tree is about 130 cm.

Measure the length and width of the classroom.

	Pacing	Tape measure
Length		
Width		

Talk about it and draw: what other "rulers" are on your body?

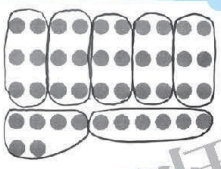
北京师范大学出版社

Unit 9 Division

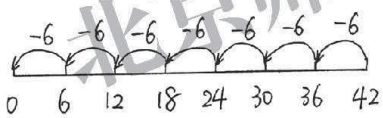
Giraffe and Birds

Think: how many houses should the giraffe prepare?

□ ○ □ = □ ( )



houses	1	2	3	4	5	6	7
birds	6	12	18	24	30	36	42



6 × (7) = 42,
42 ÷ 6 = 7

Answer: ___ houses are needed.

How many houses did the giraffe build with 63 boards?

□ ○ □ = □ ( )

Answer: The giraffe built ___ houses.

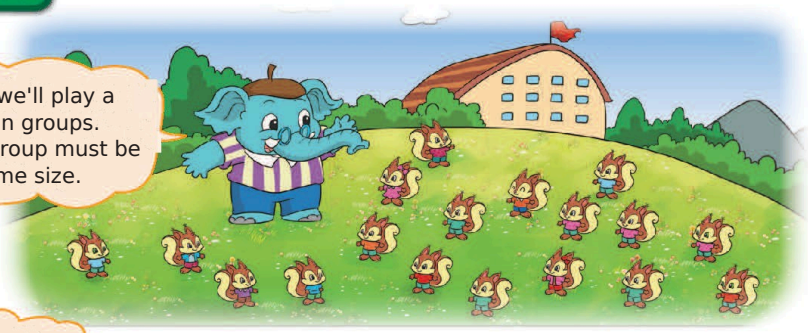
Which multiplication fact?

How many houses were built in all? How many are already lived in?...

How do we write it?

北京师范大学出版社

Try It



Start with 2 groups and try...

$18 \div 2 = 9 \cdots\cdots$

Number of groups	2			
Number in each group	9			

Largest number in the box?

$4 \times \square < 25$

$\square \times 3 < 20$

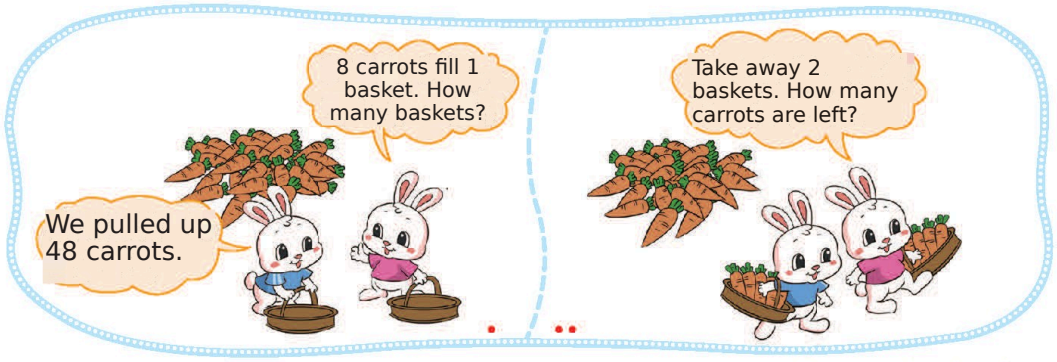
Start with 1 in the box, then try them 1 by 1.

I think of 4 × 6 = 24, 4 × 7 = 28...

Practice

1. Share 81 balloons equally into 9 groups. How many in each? Draw how you worked it out.

2.



3. Decorate the classroom.

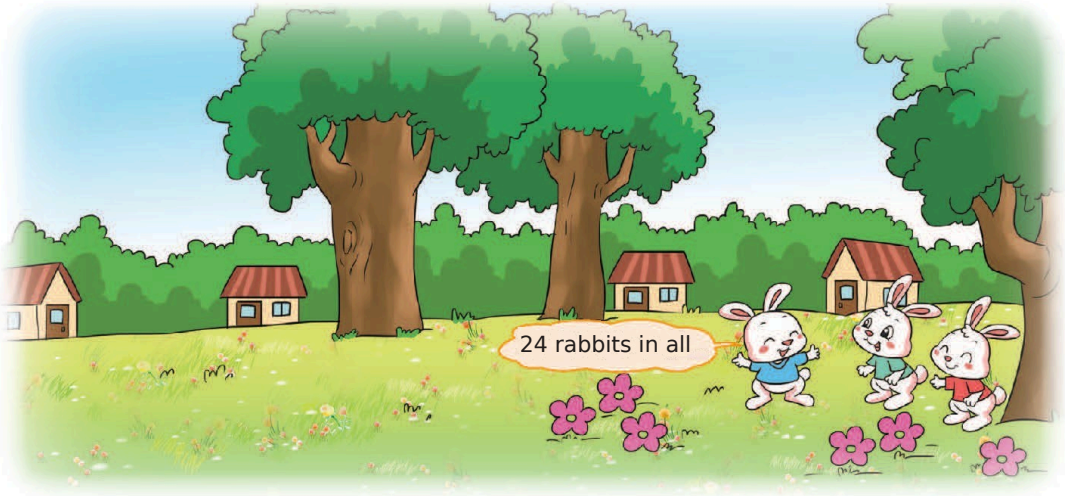
36 pots in all

(1) 4 pots each. How many people are needed?

(2) There are 6 pupils now. If they share equally, how many pots does each carry?

北京师范大学出版社

4. Rabbits find a home.



(1) There are 4 houses. How many rabbits in each?

(2) If 4 rabbits live in each house, how many houses are needed?

(3) Fill in the table.

Rabbits per house	4		6	
Number of houses		3		8

5.

$81 \div 9 =$	$54 \div 9 =$	$72 \div 9 =$	$48 \div 8 =$
$56 \div 8 =$	$49 \div 7 =$	$42 \div 7 =$	$63 \div 7 =$

6.

$7 \times \square = 56$	$\square \times 9 = 45$	$7 \times \square = 28$	$\square \times 6 = 42$
$9 \times \square = 63$	$3 \times \square = 21$	$\square \times 8 = 64$	$\square \times 5 = 35$

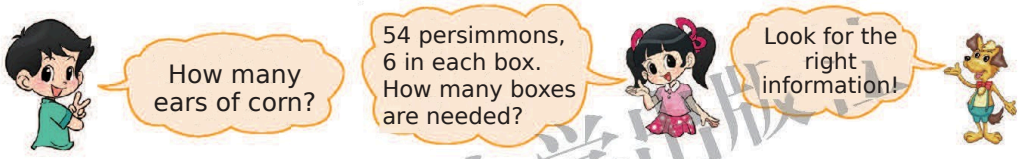
7. What is the largest number that can go in each ( )?

$8 \times (\ ) < 70$	$6 \times (\ ) < 29$	$9 \times (\ ) < 50$
$(\ ) \times 9 < 55$	$(\ ) \times 7 < 65$	$(\ ) \times 5 < 48$

北京师范大学出版社

Farmyard

Talk about it: what multiplication or division problems can you ask?



Calculate.

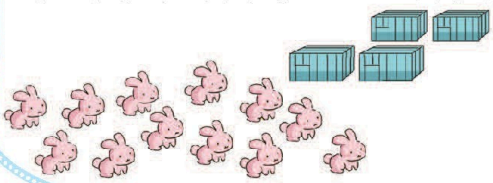
How many ears of corn are on the wall?

How many boxes are needed?

54 persimmons

6 per box

How many rabbits in each cage?



How many baskets are needed?

4 per basket

How many times as tall as the pepper is the cucumber?

□ ○ □ = □

Answer: The cucumber is _____ times as tall as the pepper.

Find problems in daily life that use multiplication or division, and try to solve them.

北京师范大学出版社

Practice

1.

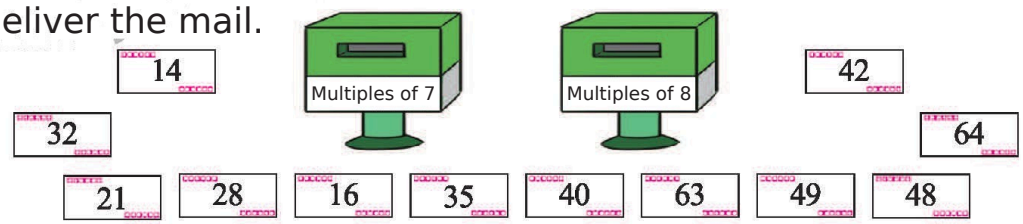
Pose multiplication or division problems. Talk and calculate.

2.

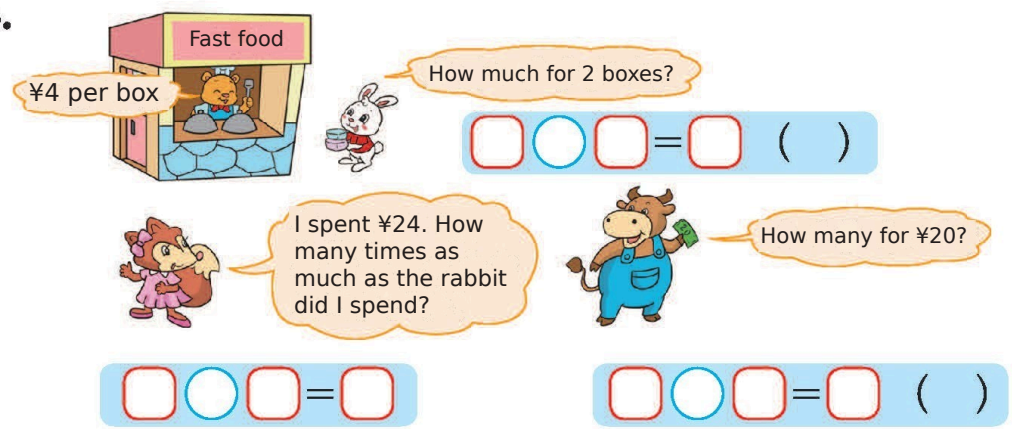
(1) Using the information above, pose two multiplication problems.

(2) Teacher Li bought only one kind of item and spent exactly ¥36. What might he have bought? How many did he buy?

3. Deliver the mail.

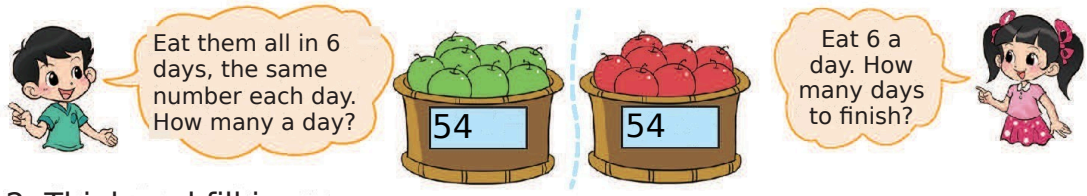


4.



Exercise 7

1. Draw a picture to show how you calculated.



2. Think and fill in.

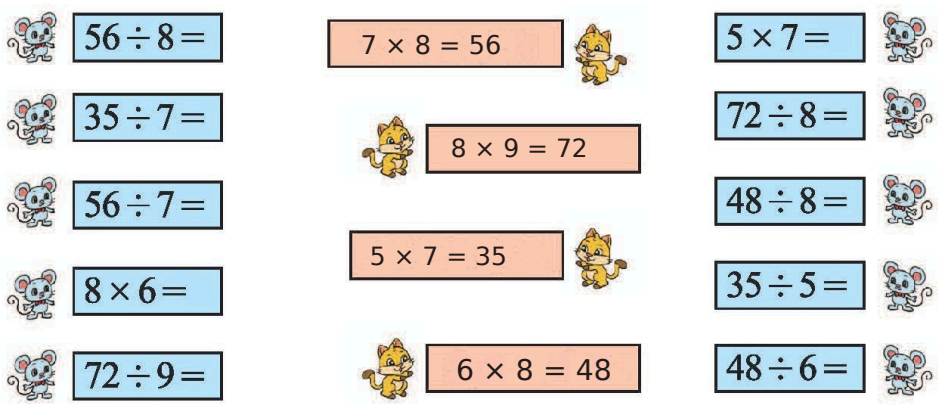
Prizes we can buy				
How many	( ) pens	( ) boxes	( ) books	( ) cases

3. Fill in the largest possible number.

$5 \times (\ \ ) < 36$　　$8 \times (\ \ ) < 39$　　$9 \times (\ \ ) < 60$

$(\ \ ) \times 9 < 83$　　$(\ \ ) \times 7 < 55$　　$(\ \ ) \times 5 < 46$

4. Cat and mouse.



华南师范大学出版社

5. Fill in.

$8 \times 3 = \square$

$\square \times \square = \square$

$\square \times \square = \square$

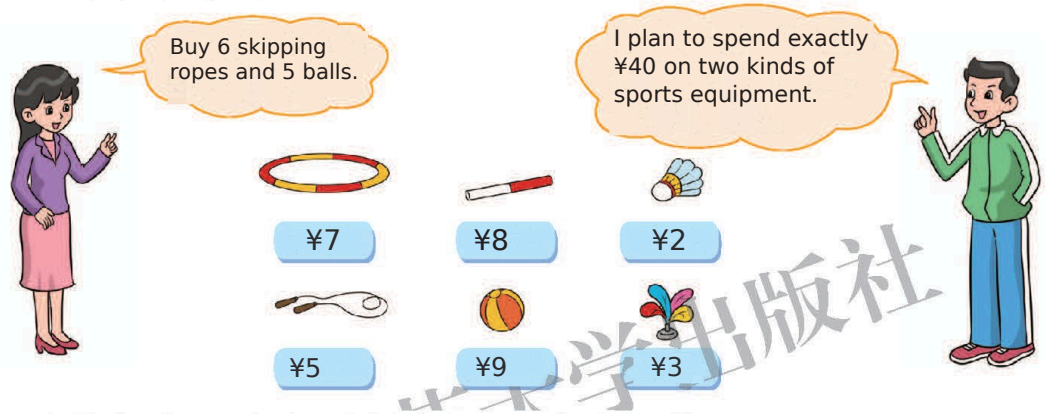
24		
8	8	8
6	6	6	6
3	3	3	3	3	3	3	3

$24 \div 3 = \square$

$\square \div \square = \square$

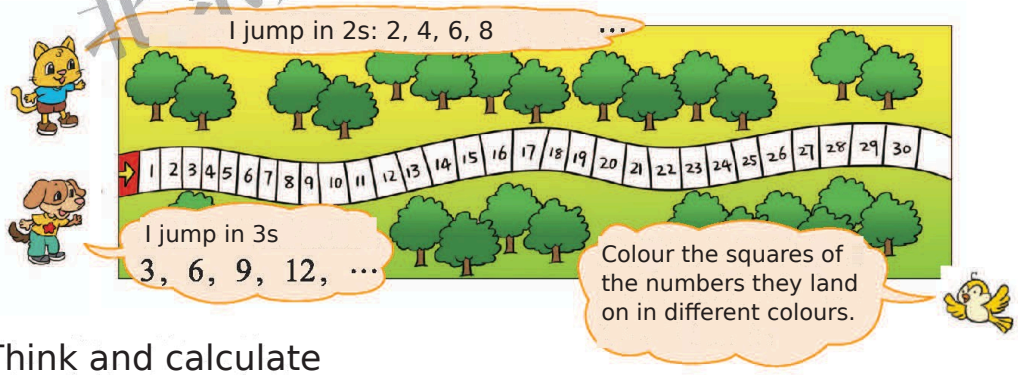
$\square \div \square = \square$

6. Buying sports equipment



Pose two maths problems and try to answer them.

7. Colour in.



8. Think and calculate

$\begin{cases} 3 \times 3 = 9 \\ 2 \times 4 = \square \end{cases}$ $\begin{cases} 4 \times 4 = 16 \\ 3 \times 5 = \square \end{cases}$ $\begin{cases} 5 \times 5 = 25 \\ 4 \times 6 = \square \end{cases}$

What is special about each group of number sentences? Can you write another group?

北京师范大学出版社

Final Review

Review and Share

Number and Algebra

On your own

1. First calculate each problem below, then choose one and make up a story.

$32+15+28$　　$65-36-12$　　$36-8+19$

2. Talk and draw. What problems can 8×7 solve? What about 35÷5?

3. Talk about Class 2(1).

There are 40 students in the class, and 22 are boys. How many are girls? Divide the girls equally into 6 groups. How many are in each group?

The boys in the class folded 38 paper cranes, and the girls folded 13 more than the boys. How many paper cranes were folded in total?

4. Can you recite all the multiplication facts? Try it.

Which fact do you find hard to remember? If you forget a multiplication fact, what can you do?

5. Explain "3 times" with an example.

6. Buying breakfast.

I want to buy 2 bowls of porridge and 4 meat pies.

Price list: porridge ¥2, tea egg ¥1, fried dough stick ¥1, meat pie ¥4

(1) Talk about it. What questions can you ask?

(2) A meat pie is how many times the price of a dough stick? Draw and explain.

(3) Think about it. What problem does 2×3 solve?

7. Paying game.

Which RMB notes and coins do we know?

How can you pay ¥12.80?

You can also...

Share Ideas

I chose 36-8+19 and made up a story: There were 36 chicks playing on the grass, 8 ran away, and 19 more came. How many are there now?

In "Buying breakfast", my question was: I want to buy 1 bowl of porridge, 1 fried dough stick and 1 tea egg. Is ¥5 enough?

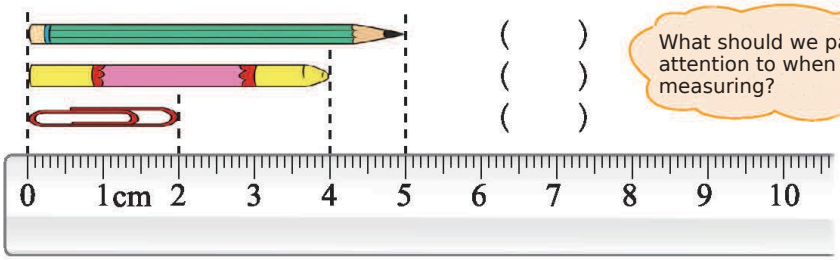
In our class, 8 students like bananas and 24 like apples. 24 is 3 groups of 8, so it is 3 times 8.

Shapes and Geometry

On your own

1. What units of length have we learned? Look around: which things are about 1 cm long, and which are about 1 m?

2. How many centimetres long is each object?



( )
( )
( )

What should we pay attention to when measuring?

3. How can we estimate lengths in everyday life? Talk about it.

Share Ideas

My thumbnail is about 1 cm long.

I compare the object's length with 1 cm or 1 m.

Exercise

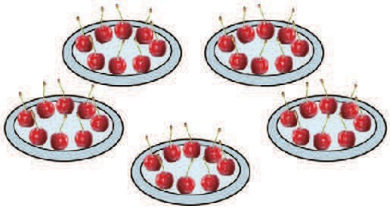
Number and Algebra

1. Can you finish within 4 minutes? See who can get them all right.

$7\times8=$	$2\times9=$	$16\div2=$	$48\div6=$
$72\div8=$	$81\div9=$	$32\div4=$	$9\times6=$
$8\times8=$	$7\times9=$	$49\div7=$	$64\div8=$
$42\div7=$	$5\times4=$	$63\div7=$	$3\times7=$
$5\times6=$	$8\times5=$	$25\div5=$	$54\div6=$
$27\div3=$	$72\div9=$	$18\div3=$	$6\times7=$

2. I say, you find.

3. Fill in, and say what each number in the number sentence means.



□ ○ □ = □ ( )

□ ○ □ = □ ( )

□ ○ □ = □ ( )

4. Draw as required, then write the number sentence and the answer.

(1) Each group has 5 △; there are 2 groups.

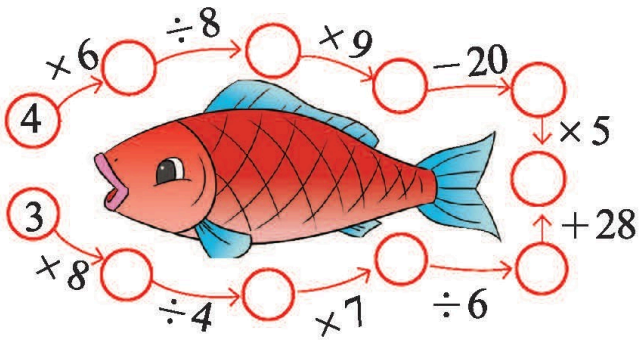
(2) First draw 18 □, then divide them equally into 3 groups.

(3) First draw 20 ○, then circle every 4 as 1 group.

(4) First draw 3 △, then draw 2 times as many ○.

北京师范大学出版社

5. Fill in.



6. Sports day.

28 students	13 students	57 students

How many students in all took part in the 3 events?

□○□○□=□( )

7.

¥9 ¥6

(1) Taoqi's money buys just 4 pencil cases. How much has he got?

□○□=□( )

(2) How many notebooks can this money buy?

□○□=□( )

8.

(1) Buy 5 How much do they cost?

(2) Can Xiaoxiao afford 3 ?

(3) What other multiplication or division problems can you pose?

北京师范大学出版社

9.

I finish it in 4 days. How many pages a day on average?

If I read 8 pages a day, how many days will it take?

24 pages in total

□ ○ □ = □ ( )　　□ ○ □ = □ ( )

10.

How much more is needed?

Let's give one together. I saved ¥56.

I only have ¥25 …

How many schoolbags in all?

There are 20.

3 fewer than the yellow ones.

11.

I am 63 this year.

Grandpa

I am 7 this year.

Qisi

My age is 5 times Qisi's age.

Dad

(1) How old is Dad this year?

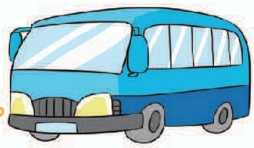
(2) How much older is Grandpa than Dad?

(3) How many times as old as Qisi is Grandpa?

12. Discuss.

There are 26 passengers. Can 4 buses seat them all?

6 passengers at most.



Mum has ¥50. Is that enough for 6 bags of washing powder?

¥9 per bag

13.

$34+37-63$	$23+76-54$	$100-58+41$
$79+9-26$	$45-14+42$	$77+14-69$

Afterword

The Compulsory Education Textbooks (Beijing Normal University Edition) were written by many heads and core members of the groups that drew up the national curriculum standards for basic education, together with subject experts, education experts, psychologists and master teachers. They rest on solid research and advanced educational ideas, and offer high-quality writing and professional service. The textbooks strive to reflect the spirit of the national curriculum standards for basic education, make use of many kinds of information resources, show the latest progress in each subject where appropriate, and stress the use of knowledge, skills and ways of thinking in real life. They stay close to students' lives, pay attention to how students learn, meet their different learning needs and promote the all-round development of every student.

The Compulsory Education Textbooks (Beijing Normal University Edition) · Mathematics (Grades 1–6), also known as the New Century Primary School Mathematics Textbooks, fully embody the basic ideas of the new century's reform of the mathematics curriculum, with the healthy growth of children as their fundamental aim. This is the 4th edition of the New Century Primary School Mathematics Textbooks. Building on the strengths of the first three editions, it has been fully revised in accordance with the Mathematics Curriculum Standards for Compulsory Education (2011 Edition).

The new edition has the following distinctive features. Its basic form of presentation is "a situation plus a series of questions", which seeks to make the unfolding of the content, the students' learning, the teachers' teaching and the reaching of the curriculum goals one whole, good for learning and for teaching, so that students keep going through the process of thinking a problem through "from beginning to end". It seeks to give students realistic, interesting and challenging learning materials, to give them time and space to explore and to share their ideas, to show how mathematical knowledge is formed and used, and to meet the needs of different students.

The aim is for students to: appreciate the close links between mathematics, nature and human society; gain the basic knowledge, basic skills, basic ideas and basic experience of activities that they need and that suit their age; develop the ability to find and pose problems and to analyse and solve them; understand the value of mathematics, become more interested in learning it and more confident of learning it well; and gain a first sense of innovation and a scientific attitude.

The chief editors of the New Century Primary School Mathematics Textbooks are Liu Jian, Kong Qiping and Zhang Dan. The other members of the writing group are Hu Guangti, Wang Yong, Tao Wenzhong, Liu Keqin, Zhu Dejiang, Wang Mingming, Chen Xiaomei, Zhang Hong, Qian Shouwang, He Fengbo, Hua Yinglong, Huang Lihua, Zhao Yanhui, Li Tie'an, Wei Huinü, Zhu Yuhong, Ren Jingye and Hou Huiying.

The chief editors of this volume are Qian Shouwang and Wang Mingming. The main people who took part in revising and finalising it were Chen Xiaomei, Hou Huiying, Zhu Dejiang, Huang Lihua, Ren Jingye and Hu Yu; the final text was compiled and approved by Liu Jian and Zhang Dan. Many local teaching researchers and front-line teachers gave valuable advice on this new round of revision.

Special thanks go to the children Di Donglai, Ma Qingyang, Wang Xiaoyi, Chen Siyu, Hou Yihan and Zhang Zhimeng, and to Zhu Lei, Guo Chenyue and Xu Yue, who were invited to contribute their work.

Because time was short, errors in the textbook are hard to avoid; we sincerely ask our readers to point them out.
